

<p>The white-lipped snail (<i>Cepaea hortensis</i>) is a very close relative of the grove snail. It is very slightly smaller than the grove snail, but shares the same variation in shell colour and banding.</p>	<p>three: a little more text is nice. Text text.</p>	<p>Green is any of a number of similar colors. Green is seen commonly in nature, especially in plants. Many plants are green mainly because of a complex chemical known as chlorophyll which is involved in photosynthesis.</p>
