

Rendering Intent: Perceptual

Rendering Intent: Relative Colorimetric

This document was generated with FOP using the ImageLoaderRawPNG image loader.

Rendering Intent: Saturation

Rendering Intent: Absolute Colorimetric

The four images are the same but for the "rendering intent" byte in the sRGB chunk. The intent is translated to a /Intent entry in the image dictionary (for instance, /Intent / Perceptual) according to the Rendering Intents section of the PDF spec. Whether that makes a visible difference is debatable...
