

Example of Odd Breaking in Left-Aligned Text

Let's try a left-aligned footnote ¹ and a justified footnote ² with long URLs in them.

See what happens when we have some left-aligned text, breaking over several lines, that goes on and on, and then concludes with a long URL. Consider:

```
<http://xmlgraphics.apache.org/fop/trunk/
embedding.html#config-internal>
```

See what happens when we have some justified text, breaking over several lines, that goes on and on, and then concludes with a long URL. Consider:

```
<http://xmlgraphics.apache.org/fop/trunk/embedding.html#config-internal>
```

¹ See what happens when we have a pretty long left-aligned footnote, breaking over several lines, that goes on and on, and then concludes with a long URL. Consider:

```
<http://xmlgraphics.apache.org/fop/trunk/embedding.html#config-internal>
```

² See what happens when we have a pretty long justified footnote, breaking over several lines, that goes on and on, and then concludes with a long URL. Consider:

```
<http://xmlgraphics.apache.org/fop/trunk/embedding.html#config-internal>
```
