RHIC/AP/114
October 1996

Four Really Large Hadron Collider papers contributed to Snowmass 96

F. Dell, M. Harrison, S. Peggs, M. Syphers, S. Tepikian, J. Wei,
Brookhaven National Laboratory
G. Goderre, Fermi National Accelerator Laboratory

This note acts as a preprint for the 4 papers that have been submitted to the proceedings of Snowmass 96 with authors "Peggs et al" and "Wei et al". Attached to this cover sheet are the following papers:

1. *Crab Crossing in a Large Hadron Collider*, J. Wei
2. *Interaction Region Analysis for a High-Field Hadron Collider*, J. Wei, G. Goderre, S. Peggs
3. *Lattices for a High-Field 30 TeV Hadron Collider*, S. Peggs, F. Dell, M. Harrison, M. Syphers, S. Tepikian
4. *Tolerable Systematic Errors in Really Large Hadron Collider Dipoles.* S. Peggs, F. Dell

Enjoy.
