TOF TAC Calibration Consumer Status and Plan

- Definition of good point

  1 channel has 69 points and 1 points has 95 TDC values.

  Good point has TDC average over 200 and over 20 TDC values.

- Number of good point for fitting (run # 143780) : 52~58
- I changed # of Good points for fitting from 5 to 50.

- I'll check TAC calibration every day during shutdown period.
- Change database from development to production.
- Keep raw data and check at offline.
