Table 1: Combined B meson integrated cross-sections from Run 1A and Run 1B. The Run 1A result includes both charged and neutral B mesons while the Run 1B result includes only charged B mesons from the first 54 pb^{-1} of data.

$p_T(B)$ (GeV/c)	σ Run 1A (nb)	σ Run 1B (nb)	σ Run 1A + Run 1B (nb)
> 6.0	$2390 \pm 320 \pm 440$	$2667 \pm 297 \pm 560$	$2538 \pm 218 \pm 533$
