## ps2pdf example

The following three equations demonstrate the loss of summation, product and integral signs when using ps2pdf:

$$
\begin{aligned}
& L=\frac{N!}{(N-D)!\prod_{h \in H} n_{h}!} \times \prod_{i=1}^{D} P\left(\mathrm{CH}_{i}\right) \times\left(\mathrm{CH}_{0}\right)^{N-D} . \\
& L_{i}=P\left(\text { No. captures }=v_{i}\right)=\sum_{c=1}^{C} \pi_{c} \theta_{c}^{v_{i}}\left(1-\theta_{c}\right)^{1-v_{i}} \\
& L_{i}=P\left(\text { No. captures }=v_{i}\right)=\int_{0}^{1} x^{v_{i}}(1-x)^{1-v_{i}} f(x) d x
\end{aligned}
$$
