

With increasing costs and decreasing reimbursements, pharmacies are under great pressure to control costs in all aspects of their business.

Increase efficiency and accuracy. Decrease costs.

Improved inventory management is a key initiative in every business operation. Pharmacies that rely on manual processes for inventory tracking, product procurement, and vendor management spend considerable personnel time on these activities. In addition to increasing labor costs, manual processes are subject to human error that can lead to costly results, such as product stock-outs, rush orders, high inventory carrying charges, and failure to take advantage of pricing discounts.

While technology can remedy these problems, the challenge for your pharmacy is to find the right technology solution from the right company – one that will deliver the cost-saving benefits you seek.

What if you could work with a company that can:

- Help you identify and address inefficiencies in your current processes before recommending a technology configuration?
- Deliver improved efficiency and accuracy without requiring a large investment in on-site equipment?
- Integrate all your vendors – not just pharmaceutical suppliers – so you can realize efficiency benefits in all areas of your business?
- Connect all your locations so you can have an enterprise view over inventory and ordering activities?

AmerisourceBergen® is that company and the IntelliOrder® inventory management and purchasing system is the solution.

IntelliOrder inventory management and purchasing system can increase efficiency and accuracy.

Take control

Part of the RxWorks™ Suite family of technology and consulting solutions, IntelliOrder is the ideal choice for pharmacies that want to move from manual inventory management procedures to an automated approach that fits their business. Unlike other automated solutions out there, IntelliOrder is:

Powered by the Internet. You simply go online to manage your inventory and procurement in a secure Web-based environment. There's no need to spend money acquiring and managing expensive IT infrastructure and no software to install.

IntelliOrder®

Inventory Management and Purchasing System

Versatile. IntelliOrder will connect you to all your vendors so you can manage all your products, from pharmaceuticals to durable medical goods to OTCs and front-end products. It's a one-stop shopping environment that eliminates the expense and time involved in multiple ordering systems.

All-encompassing. IntelliOrder can connect every location in your enterprise and gives you everything you need to take control of your inventory, including:

- Centralized ordering that consolidates all your product catalogs into one automated ordering platform.
- Inventory management controls that monitor your min – max levels and automatically generate POs for your approval. This helps eliminate stock-outs and excess inventory, and puts an end to personnel time spent walking the aisles and “eye-balling” ordering needs.
- Complete tracking of product movement and purchases between departments and other sites so you can monitor cost centers.
- Multiple approval levels for requisitions and POs tailored to your management structure and purchasing flow.

Fast and accurate. the Internet-fueled speed of the IntelliOrder system significantly reduces the time required to process purchase orders, often slashing several days from the order cycle. And because the system is EDI-capable, you can get immediate order confirmation with more accurate matching between your payables and online invoices.

Move forward with confidence

Even though the economic advantages are compelling, moving from manual inventory processes to an automated solution can be a scary proposition. AmerisourceBergen can help you make that transition with confidence with a solution that is:

Right-sized and practical. Our consultants will sit down with you and make sure we understand your current methods in order to recommend an IntelliOrder configuration that has the functionality your business requires. In addition, we'll assist you in uploading your current data to populate the system.

Easy to operate. Our standardized platforms integrate with most pharmacy IT systems so system start-up is a snap. There's no hardware or software to install – all you need is a Web-enabled PC. And even though IntelliOrder is remarkably easy to use, with an intuitive user interface that guides you through all the functions, we can provide on-site training to ensure that your staff is fully comfortable and quickly up to speed with every aspect of the system.

Completely protected. IntelliOrder's secure Web environment will keep your data safe and we'll maintain a full-system back-up at our site to ensure complete data protection.

Cost-effective. There's no large capital investment and no long-term commitment with IntelliOrder – just a low monthly fee that will more than pay for itself in the improved efficiency, accuracy and cost-savings of your inventory management and procurement processes.
