1. Create a job with single sided with staple product type and register a file. Select Book view and click next. Select

Document -> Move and move the page right side entirely out of range and click OK. Now the book view has the pages in the

right side. Checking the page view shows empty page area.

2. Create a new job and register a file with A6 portrait size and that size is not allowed for any product type which is

unexpected behaviour for product type supporting all paper sizes. After this step user is not allowed to register even normal

A4 file. The user is forced to create a new project again to work.

3. Create a job which supports book/imposition view . Try to draw vector objects into the page area. Fails to draw objects.

4. Create a job with double sided with staple and punch. Register a file and select the last page. Change the paper size and perform
Edit->Undo. Check redo is enabled. The Redo function is not enabled.
