

Issue: If you open the attached PPTX, Impress shows a text box behind a PNG, that has transparency. Other programs show only the PNG.

The slide of this file is derived from a PPTX that was created by PowerPoint 2004 for Mac (according to the properties of the original file). I edited that presentation with SoftMaker Presentations and deleted the unnecessary stuff.

The text behind the PNG is in ‚Arial Narrow‘. The text in the PNG has a different type.

The text in the box is not the same as in the PNG. ‚y(1)q‘ and ‚x(2)p‘ are missing in the text of the box. Impress renders in the original presentation only slides wrong, that contain mathematical expressions like these.

Open XML Productivity Tool finds no violation against OOXML 2007 and 2013 (but against OOXML 2010!).

Should look like this:

Man kann nun eine Matrix aufstellen, bei der die Zeilen den $y_{(1)q}$ und die Spalten den $x_{(2)p}$ zugeordnet sind, und festlegen, dass die Elemente dieser Matrix die Werte 0 oder 1 annehmen.

Slide was rendered correct in LO 4.0

The screenshot displays the LibreOffice Impress interface. The main slide contains the following text:

Man kann nun eine Matrix aufstellen, bei der die Zeilen den $y_{(1)q}$ und die Spalten den $x_{(2)p}$ zugeordnet sind, und festlegen, dass die Elemente dieser Matrix die Werte 0 oder 1 annehmen.

A LibreOffice splash dialog box is overlaid on the slide. The dialog box features the LibreOffice logo and the text "The Document Foundation". It also displays the version information: "Version 4.0.0.3 (Build ID: 7545bee9c2a0782548772a21bc84a9dcc583b89)". Below this, it states: "LibreOffice is a modern, easy-to-use, open source productivity suite for word processing, spreadsheets, presentations and more." At the bottom of the dialog box, there are buttons for "Credits", "Website", and "Close".

The interface includes a menu bar (File, Edit, View, Insert, Format, Tools, Slide Show, Window, Help), a toolbar, a Slides panel on the left, a Tasks panel on the right, and a status bar at the bottom showing "Slide 1 / 1 | Titel und Inhalt" and a zoom level of 117%.

In LO 4.2 the issue appears.
