

Opening the PPTS „Kapitel_2_-_System.ppsx“ start automatically Impress in presentation mode. University logo (WMF file) is rendered wrong.

Now open context menu and choose „Edit presentation“. In Edit mode Impress renders the logo correct.

This screenshot shows the same presentation slide in LibreOffice Impress, but in edit mode. The university logo is now rendered correctly as a standard blue graphic. The slide content, including the title and footer, remains the same. The bottom right corner displays the same technical information as the previous screenshot, indicating the rendering is now correct in edit mode.
