This is a document to demonstrate the tooltip behaviour in Word when exported to PDF.[1]

---

[1] In Word (created with my daughter's Office 365 account, since I don't have a paid copy of Word at my disposal [I use LibreOffice, after all...]), hovering over a footnote marker pops up a tooltip with the footnote's contents—as well as a "click to edit" function.

Hovering over the footnote marker on the second page does the same in Word.[2]

---

[2] However, when exported from Word to PDF, there is no tooltip when hovering over a footnote marker...
