

Only on macOS, with Apple screen resolutions
1680 x 1050 or 1280 x 800 or 1152 x 720

Libreoffice WRITER, CALC and BASE the personalized color scheme fails to extend the the personalization color e.g. green here and does not cover all the way to the right side of the app. In reslution of 1024 x 640 however the entire Menu (top and bottom area!) is colored by the personalized scheme. Other apps -PRESENTATION -DRAW -FORMULA are not affected

for some reason this minor design bug does not occur in Libreoffice V6.2.8 macOS 10.13: -Presentation -Draw -Formula, nor does this occur in a Windows 8 installation of Libreoffice at all
