

This is a paragraph with fixed spacing and character borders. You can see that the height of the border is inconsistent between lines. If you randomly type and remove words, you can get the heights to change.

This is another paragraph, this time with line breaks. You can see that the border is cut off at the end of the line.

This is a single line.

You can see that single lines render correctly.

Except when they don't.

See, it changed again.
