

Starting the document with a  
section column break!!  
Two lovely columns.  
They balance if there is a  
continuous break.

Otherwise, it first fills the page  
before filling the next column.  
Any effective page breaks  
stop the balancing act.

---

Single column, now that I am in a new section

---

Three columns  
now, split with a  
section column  
break.
