Dear Sirs,

Before talking about the bug found in the opening of a .pdf file by Libreoffice, I would like to provide this news: in Italy, the doctors of the national health service, send their patients prescriptions containing the prescriptions of the laboratory tests or the medicines to be taken; together with the prescriptions, the doctor also sends a personal password (for privacy reasons) that allows them to open and print the above

Each prescription has 2 barcodes at the top right, which allow the pharmacist or laboratory to register the operation and present it to the Ministry of Health for reimbursement.

While Adobe Reader or Google open and print the .pdf file correctly (see picture below)

Liguria		0700A	40961496	33
COGNOME E NOME/INIZIALI DELL'ASSISTITO: CORRIEF INDIRIZZO: VIA GIACOMO BOERO CAP: 16132 CI 0016-025		ROV: GE	CRRGCR38C2	261726H
ESENZIONE:NON ESENTE SIGLA PROVINCIA TIPOLOGIA PRESCRIZIONE(S,H): ALTRO		DISPOSIZ A' PRESCRIZIONI	ZIONI REGIONA E (U,B,D,P):	LI:
PRES	CRIZIONE		QTA	NOTA
(HCF) PANTOPRAZOLO 20MG 28 UNITA' USO OR	ALE		0	048
(04)			2	040
Adobe Reader display an correct	nd print the bar	code	2	

N.CONFEZIONI/PRESTAZIONI:2 TIPO RICETTA:Assist.SSN DATA:28/09/2020 CODICE FISCALE DEL MEDICO:MRNFNC91D69D969H CODICE AUTENTICAZIONE:280920200849148160003825106000 COGNOME E NOME DEL MEDICO:MEIRANA FRANCESCA Rilasciato ai sensi dell'art 11 comma 16 del DI 31 mar 2010, p.78 e dell'art 1 comma 4 del DI 2 por 2011 Libreoffice, on the other hand, displays and prints an incorrect document, which does not contain the barcode, but perhaps an interpretation of its contents (see picture below)

I hope you will correct this error as soon as possible, which isn't tolerable in Libreoffice quality software.

I enclose the file (**prescription.pdf**) with which you will be able to do the tests, and the password: **REDC4E**, which allows you to open the aforementioned

Regards
