

Complex Link: http://theWebalyst.com#id=wab_w

[HERE](#)

Simple Link: <http://theWebalyst.com>

[HERE](#)

First link will not be exported correctly to PDF, in PDF you will see a Tooltip like following

A screenshot of a PDF document showing a tooltip for a broken link. The tooltip is a yellow rectangular box with a black border, containing the text: file:///C:/Users/Public/Documents/LibO/33596_hyperlinks/http:%2F%2FtheWebalyst.com%23id=wab_w. The tooltip is positioned over a blue underlined link in the PDF text.

file:///C:/Users/Public/Documents/LibO/33596_hyperlinks/http:%2F%2FtheWebalyst.com%23id=wab_w

leading to somewhere on your haddisk.
