

1 – First, you draw an up arrow, as shown below

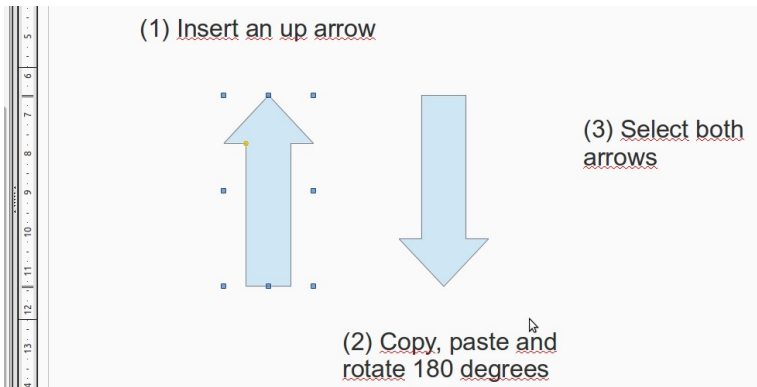

2 – Copy and paste the arrow. Then, rotate it 180 degrees

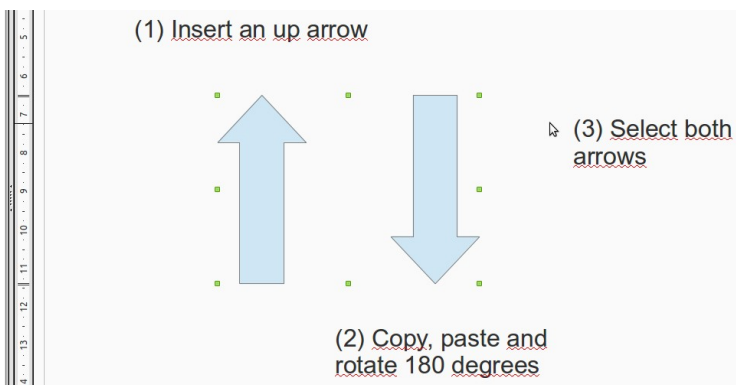

3 – Select both arrows using the mouse

4 – Notice that only the first arrow is selected

5 – Now select both arrows using the Shift key (which works OK)

6 – Now export it as a PNG file. It will add blank spaces to the file (I chose to export only the “Selection”)
