LibO Add-on Search

The Add-on has no options

It only lists results from one sheet at a time. (The current sheet) To find another term, the application must be relaunched

The search produces a list of results that you can navigate by scrolling or clicking on them. (Again, Perfect)

No need to relaunch for new search but you must select the "normal" tab.

Microsoft Excel search

MS Excel can search the entire workbook and also gives a list of result that can be navigated by clicking or scrolling

All these searches were carried out using the same file and search term.
