Example of Figure 3.5.2 from the above web page (but in horizontal writing)
Fig 3.5.2 の事例

(I do not know why the ruby characters are shown in grey background. Maybe a global setting?)

きもん　　　ほうがく　　ぎょうし
鬼門の方角を凝視する。

Figure 3.5.4

あじさい　　　るつぼ　いなか
紫陽花、坩堝、田舎
(Bug. If I added Ruby characters と紫陽花、坩堝、田舎　altogether, but the dialog shows the incorrect breakdown of the strings, I only added ruby characters to 紫陽花 using that dialog and then tried to add 坩堝, and 田舎　separately, then the display of ruby characters on 坩堝　and 田舎　become unreliably shown. Initially the ruby characters on 坩堝　and 田舎　were shown as grey horizontal line, but as more sentences to describe this problem was typed in, suddenly they were shown. I have no idea if they turn into grey horizontal line if scrolled off the screen and then again shown inside the screen...

The following line has the ruby characters for 紫陽花, 坩堝, and 田舎　separately added. (Each of the word was selected, and ruby characters were added. This was repeated three times.)

あじさい　　　るつぼ　いなか
紫陽花、坩堝、田舎

Well the timing the ruby characters are shown is a little delayed from finishing the Ruby dialog. For example, in the above line, after I added ruby characters for "田舎" are added, ruby characters are not shown immediately. Only after I move the cursor to the next line by inserting a newline, the ruby characters are displayed.

There is another problem :-(

If I try to select the above line as a whole, somehow the ruby characters above "田舎" can not be selected as part of the selection !? Well, actually, it could. But it requires some careful mouse movement. An intuitive movement could not select the whole line including the Ruby characters above "田舎" easily -:-(

Copied and pasted and then enlarged: One up for LO. When I enlarged the selected line (below), the offset of ruby characters from the main text base line are automatically increased so that the ruby

characters are visible on separate line!

<ruby>紫陽花<rt>あじさい</rt></ruby>、<ruby>坩堝<rt>るつぼ</rt></ruby>、<ruby>田舎<rt>いなか</rt></ruby>

[end of memo]
