Words written  Image Inserted from file on disk using insert image icon

Image appears in centre of line, very small. All acceptable and better than large initial image. Moved it to the right and enlarged. All Ok.  Had not saved file so now saved as docx – effectively Save As.  Still AOK.

Typed this text and did a Save.  All still looks OK after the Save.

To save at this stage I am about to make a pdf copy.  First do ordinary save.  Then went to Explorer and made a backup just in case that has useful info to help debug.

Now save as pdf
