

Steps to reproduce my problems:

In a blank Writer document click on Help | Feedback ... and see this screen:

Click on the red-circled control: "File an enhancement request" and see this screen:"

I added a comment and wanted to upload a document. I used the Browse button to locate the document to be uploaded, I manually described it as an ODT... and then there is no button upload it.

I can click Submit, but then how do I add a second upload? I can go back to my bug if I know the number, but if I am making the first post in a new report I never know the number until someone e-mails me.
