

Ophir LOJKINE
16/04/1994

POSITION

FORMAL EDUCATION

- 2017: MASTER DEGREE IN ENGINEERING - UNIVERSITY OF BAUMAN- MOSCOW**
Management of computer system
- 2015: MASTER DEGREE IN ENGINEERING- ÉCOLE CENTRALE DE NANTES - NANTES**
General engineering and Information technologies
- 2013: FRENCH "CLASSES PRÉPARATOIRES"- LYCÉE LAKANAL - SCEAUX**
Physics, Mathematics, Engineering
- 2011: FRENCH HIGH SCHOOL- LYCÉE HENRI IV - PARIS**
Mathematics, Physics, Natural science

TRAININGS & CERTIFICATIONS

- ✓ 2015: TOEIC 930

TECHNICAL KNOWLEDGE

OPERATING SYSTEMS

LINUX

PROGRAMMING LANGUAGES

Languages I master: Python, Javascript, SQL, HTML/CSS
Languages I know: Java, C, C++, Haskell
Languages I have some experience with: PHP, coffeescript, bash

FRAMEWORKS

AngularJS, BackboneJS

DATABASES

MySQL, PostgreSQL, SQLite

NETWORKS

HTTP protocol, websockets, TCP/IP and UDP.

SOFTWARE & TOOLS

git, vim, bug trackers, UML modelers (StarUML)
LibreOffice, GIMP, Inkscape

METHODOLOGIES

UML

BUSINESS KNOWLEDGE

UTILITIES

I worked at ERDF (now Enedis, french electricity distribution company), and have a good understanding of how electricity distribution works.

FUNCTIONAL KNOWLEDGE

TESTING

I have experience with building, running and maintaining a test suite for a project, as I maintain several test suites for my FOSS projects.

APPLICATION MANAGEMENT

Experienced with writing reading and writing technical documentation in both english and french. I'm used to using issue trackers. I help users of my open source projects on a regular basis, by giving support and technical instructions.

PEOPLE MANAGEMENT

I've already worked full-time in teams of developers during my internships. I love to have technical discussion with qualified people, proposing new ideas, and evaluating the ones of others. I've had project management lessons at the university, both in Nantes and Moscow.

SPOKEN LANGUAGES

FRENCH: Mother tongue

ENGLISH: Fluent

RUSSIAN: Good command

PROFESSIONAL EXPERIENCE

COMPANY NAME : FROM 07/2014 TO 08/2014

Position: Front-end developer intern

Context of the project: Agile development of the monalbumphoto.fr photoalbum building web interface.

Achievements: I introduced customized SVG graphics in the interface, introduced a promise-based design for font loading in order to solve race conditions, and overall contributed to many different parts of the code.

Team: I was part of the frontend team, composed of 6 full-time web developers

TECHNICAL ENVIRONMENT/METHODOLOGIES

AGILE development, use of trello, github, git
Development in coffeescript using backbone.js

COMPANY NAME : FROM 04/2015 TO 08/2015

Position: Data analyst and developer intern

Context of the project:

Achievements: Fully realized the backend and frontend of a data analysis software, targeted towards short and middle-term prediction of energy needs.

Team: One other developer, technicians, agency manager

- ✓ Design and realize a predictive software for electricity consumption
- ✓ Program a web application to help technicians on the field accessing important data and communicating one to another.
- ✓ Take part to an "innovation program" to make new interesting ideas emerge, encouraging long-term thinking inside the enterprise.

TECHNICAL ENVIRONMENT/METHODOLOGIES

Worked on ERDF's own intranet, interacting with MySQL databases and FTP datastores. Worked with strong information security restrictions.
