

A little Text, scanned
with Gimp.

This way a *.jpg-file is inserted in LO when it is saved as a greyscale-file in GIMP.

A little Text, scanned
with Gimp.

Here is the same scanned text, now saved as a RGB-*.jpg-image.

If a *.jpg-image is saved as greyscale LO will flip it horizontal. It will be flipped back when exporting to a *.pdf. Could only be shown with printing to a file.
