

Steps to Reproduce

1. Draw a Rectangle
2. Edit text of this rectangle
3. Select the text (I use Ctrl+A)

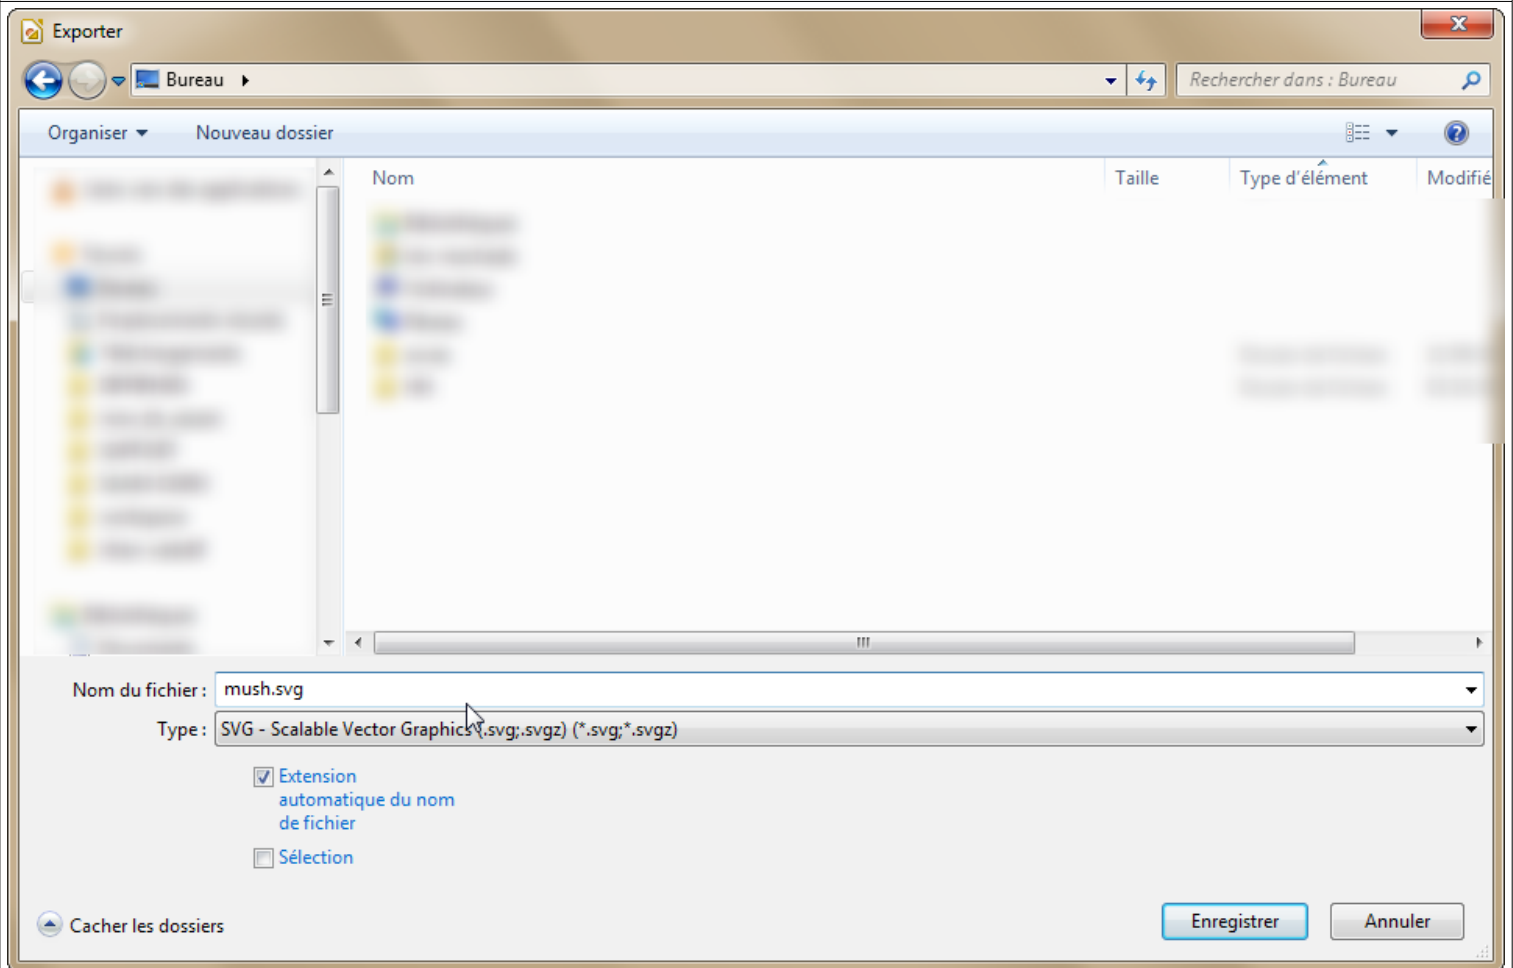

4. Click on menu Insert > Hyperlink (I use Ctrl+K)
5. In Form, set the hyperlink value to "https://bugs.documentfoundation.org"
6. In Form, set the Frame value to "_parent"

7. Click on OK button
8. Click on menu : File > Export

9. Select SVG file type

10. Click on save button

Actual Results

1. Open SVG file with a text editor (I use Notepad++)
2. Look for anchor "a" tag
3. See the xlink property is defined but there is no target property.

```
<g id="id3">
  <rect class="BoundingBox" stroke="none" fill="none" x="2299" y="2699" width="3703"
height="2403"/>
  <path fill="rgb(114,159,207)" stroke="none" d="M 4150,5100 L 2300,5100 2300,2700
6000,2700 6000,5100 4150,5100 z"/>
  <path fill="none" stroke="rgb(52,101,164)" d="M 4150,5100 L 2300,5100 2300,2700
6000,2700 6000,5100 4150,5100 z"/>
  <text class="TextShape"><tspan class="TextParagraph" font-family="Liberation Sans,
sans-serif" font-size="635px" font-weight="400"><tspan class="TextPosition" x="2654"
y="4121"><tspan id="id4" fill="rgb(0,0,128)" stroke="none" class="UrlField"
xlink:href="https://bugs.documentfoundation.org/"><a
xlink:href="https://bugs.documentfoundation.org/">Mushroom</a></tspan></tspan></tspan></text>
  <desc class="HyperlinkIdList">id4</desc>
</g>
```

4. Re-open Hyperlink Dialog on the text
5. See the Frame value of hyperlink contains nothing
