

Steps to Reproduce

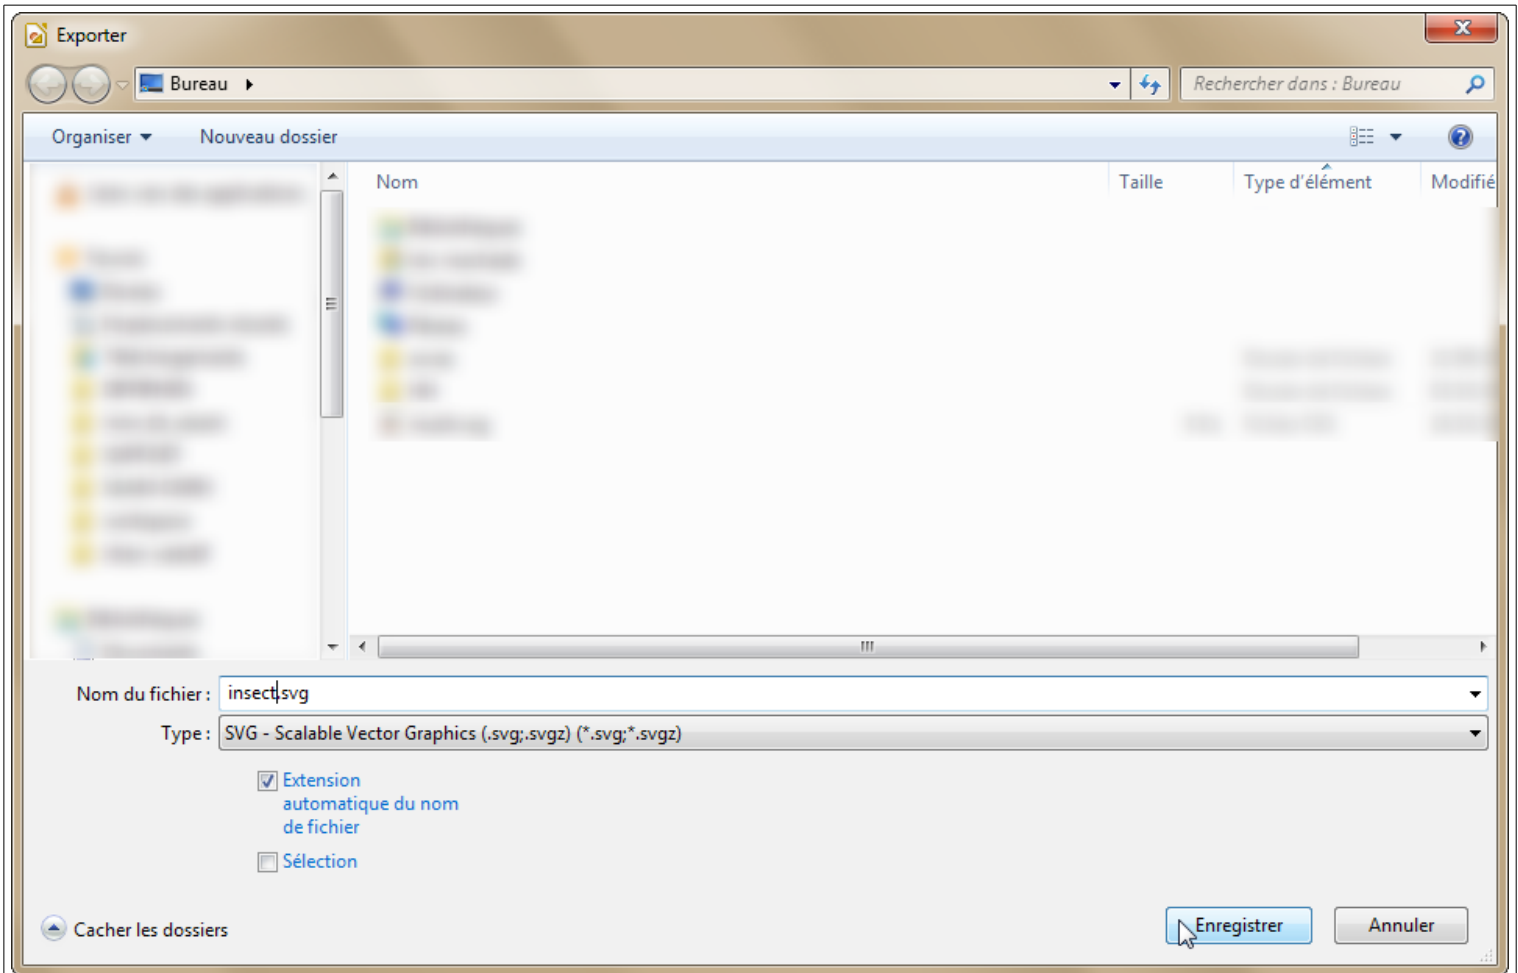

1. Draw a Rectangle
2. Edit text of this rectangle
3. Select the text (I use Ctrl+A)

4. Click on menu Insert > Hyperlink (I use Ctrl+K)
5. Select Document Link
6. In Form, set the hyperlink value to "./insect.html"

7. Click on OK button
8. Click on menu : File > Export
9. Select SVG file type

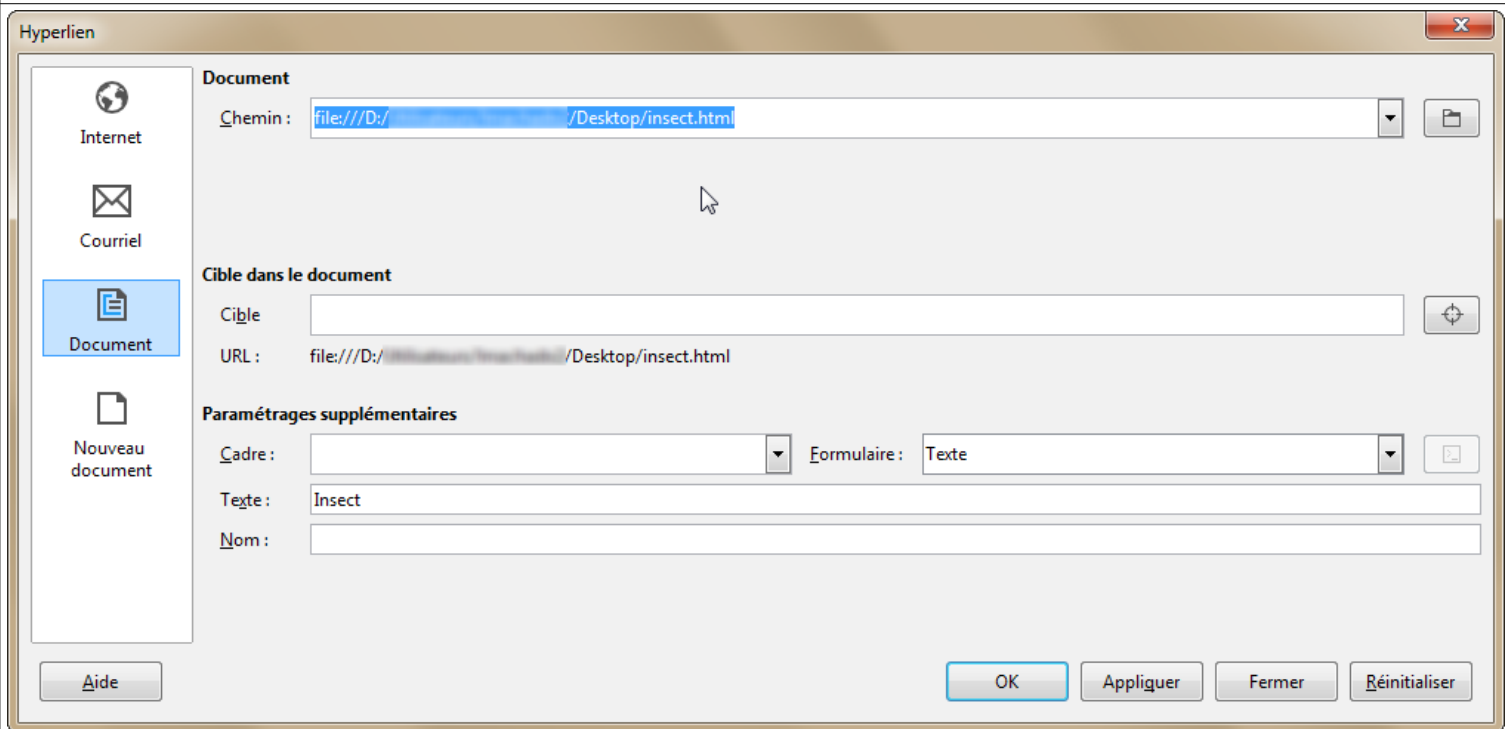

10. Click on save button

Actual Results

1. Open SVG file with a text editor (I use Notepad++)
2. Look for anchor "a" tag
3. See there is no anchor

```
<g id="id3">
  <rect class="BoundingBox" stroke="none" fill="none" x="1899" y="2199" width="3003"
height="1803"/>
  <path fill="rgb(114,159,207)" stroke="none" d="M 3400,4000 L 1900,4000 1900,2200
4900,2200 4900,4000 3400,4000 Z"/>
  <path fill="none" stroke="rgb(52,101,164)" d="M 3400,4000 L 1900,4000 1900,2200
4900,2200 4900,4000 3400,4000 Z"/>
  <text class="TextShape"><tspan class="TextParagraph" font-family="Liberation Sans,
sans-serif" font-size="635px" font-weight="400"><tspan class="TextPosition" x="2554"
y="3321"><tspan fill="rgb(0,0,128)" stroke="none">Insect</tspan></tspan></tspan></text>
</g>
```

4. Re-open Hyperlink Dialog on the text
5. See the value of hyperlink is now changed to an absolute path

6. If you re-export to a new SVG file, the hyperlink is present as an absolute path...

```
<g id="id3"><rect class="BoundingBox" stroke="none" fill="none" x="1899" y="2199"
width="3003" height="1803"/>

  <path fill="rgb(114,159,207)" stroke="none" d="M 3400,4000 L 1900,4000 1900,2200
4900,2200 4900,4000 3400,4000 Z"/>
  <path fill="none" stroke="rgb(52,101,164)" d="M 3400,4000 L 1900,4000 1900,2200
4900,2200 4900,4000 3400,4000 Z"/>
  <text class="TextShape"><tspan class="TextParagraph" font-family="Liberation Sans,
sans-serif" font-size="635px" font-weight="400"><tspan class="TextPosition" x="2554"
y="3321"><tspan id="id4" fill="rgb(0,0,128)" stroke="none" class="UrlField"
xlink:href="file:///D:/xxx/Desktop/insect.html"><a
xlink:href="file:///D:/xxx/Desktop/insect.html">Insect</a></tspan></tspan></tspan></text>
  <desc class="HyperlinkIdList">id4</desc>
</g>
```
