Here you find a description of several different paragraph style formats.
"Title" is for unnumbered Headings
1. "Heading 1" is for numbered Headings
You may alter the look of the numbering on the second page of the "Style Format" dialog. Click on the icon in the toolbar.
1.1 "Heading 2" is numbered in hierarchy level 2
1.1.1 "Heading 3" is numbered in hierarchy level 3
"Book Title" is only for the title page and does not mark itself and the following text as being a chapter (important for the Navigator and the TOC).
"Standard" is a format for the main text. It has a clear font face for screen typing (default is "Arial", because this is available on all platforms).
First lines of "Standard" paragraphs are indented by 0.25", except after a title / heading or an empty line.
Standard Office is equal to "Standard", except that first lines do not get indented.
"Standard Book" is a format for the book main text. It has a serif font face for printing (default is "Times New Roman", because this is available on all platforms).
First lines of "Standard Book" paragraphs are indented by 0.25", except after a title / heading or an empty line.
• "Bullets" is a style format for listed text.
• "Bullets" is a format for listed text.
• "Bullets" is a format for listed text.
1. "Enumeration" is a style format for numbered text lists.
2. "Enumeration" is a style format for numbered text lists.
3. "Enumeration" is a style format for numbered text lists.
