

https://bugs.documentfoundation.org/show_bug.cgi?id=99662
Cornouws, 20161108

This file has two objects with a link to open another pdf file.
The first without the extension pdf in the name
The second with the extension pdf in the name

The first one does not open, **unless**, you link to a target in the document
The second one does...

Click me to open file
99662_To_Open.pdf

Click me to open file
99662_To_Open

NB: tried various settings in PDF options dialog.
Does not make a difference for me.
