Mozilla - CA Program

Case Information

Case Number	00000029	**Case Record Type**	CA Owner/Root Inclusion Request
CA Owner/Certificate Name	MULTICERT	**Request Status**	Need Information from CA

Additional Case Information

Subject	New Owner/Root inclusion requested	**Case Reason**	New Owner/Root inclusion requested

Bugzilla Information

Link to Bugzilla Bug	https://bugzilla.mozilla.org/show_bug.cgi?id=1040072

General information about CA's associated organization

CA Email Alias 1	ca.forum@multicert.com		
CA Email Alias 2			
Company Website	https://www.multicert.com/pt/	**Verified?**	Verified
Organizational Type	Private Corporation	**Verified?**	Verified
Organizational Type (Others)		**Verified?**	Not Applicable
Geographic Focus	Portugal	**Verified?**	Verified
Primary Market / Customer Base	Multicert is one of the biggest Portuguese CAs issuing digital qualified certificates for general public.	**Verified?**	Verified
Impact to Mozilla Users	90% of Multicert customers are Mozzilla users. They use their certificate for home banking, online shops and other kind of electronic transactions. Having Multicert Root CA globally recognized and installed by default, acting as a relying party, will significantly enhance the user experience of e-signature and e-authentication services for Mozzilla customers.	**Verified?**	Verified

Response to Mozilla's list of Recommended Practices

Recommended Practices	https://wiki.mozilla.org/CA:Recommended_Practices#CA_Recommended_Practices	**Recommended Practices Statement**	I have reviewed Mozilla's list of Recommended Practices, and confirm that we follow those practices, with exceptions and clarifications noted in the text box below.
CA's Response to Recommended Practices	* Reasons for Revocation: Root CPS section 5.7.5 * DNS names go in SAN: SSL CP section 3.1.2: DNS = <full qualified domain name of the Web server>, Maximum 7 Domains.	**Verified?**	Verified

This extension contain at least one entry. Each entry is either
a dNSName containing the Fully-
Qualified Domain Name or an iPAddress containing the IP
address of a server.

Response to Mozilla's list of Potentially Problematic Practices

Potentially Problematic Practices	https://wiki.mozilla.org /CA:Problematic_Practices#Potentially_problematic_CA_practices	**Problematic Practices Statement**	I have reviewed Mozilla's list of Potentially Problematic Practices, and confirm that we do not do those practices, with exceptions and clarifications noted in the text box below.
CA's Response to Problematic Practices	* SSL certs are OV. * We are no longer issuing SHA-1 SSL certificates that chain up to our roots in Mozilla's program. We have issued about 4 SHA-1 SSL certificates that are valid beyond January 1, 2017, that we have not yet revoked, and we plan to have them revoked by July 31, 2016.	**Verified?**	Verified

Root Case Record # 1

Root Case Information

Root Certificate Name	MULTICERT Root Certification Authority 01	**Root Case No**	R00000033
Request Status	Need Information from CA	**Case Number**	00000029

Additional Root Case Information

Subject	Include MULTICERT Root Certification Authority 01 root cert

Technical Information about Root Certificate

CA Hierarchy Information

CA Hierarchy	MULTICERT Root CA will issue certificates for subordinate CAs under MULTICERT PKI, and will also issue certificates for managed subordinate CAs of large organizations and governmental bodies. There are, for now, 2 Certificate Authorities subordinate to MULTICERT Root CA: 1) MULTICERT CA is responsible for qualified certificate issuance and SSL OV. 2) MULTICERT TS CA is responsible for services certificate issuance as TSL service, TSA service, etc. All these CA's are accredited by GNS (Gabinete Nacional de Segurança - http://www.gns.gov.pt/) or http://www.gns.gov.pt/media/1891/TSLPTHR.pdf.	**Verified?**	Verified
Externally Operated SubCAs	NEED: Please carefully read sections 8 through 14 of https://www.mozilla.org/en-US/about/governance/policies/security-group/certs/policy/inclusion/ and confirm that all future subCAs of MULTICERT will be required to be audited by an independent, competent party according to the ETSI or WebTrust audit criteria as per sections 11 through 14 of Mozilla's policy (unless they are technically constrained as described in section 9 of Mozilla policy).	**Verified?**	Need Response From CA

Is this audit requirement in your CP/CPS?

MULTICERT will also issue certificates for managed subordinate CAs of large organizations and governmental bodies. These subordinate CAs, in turn, issue the following end entity certificate types: Qualified Signature, Authentication, Advanced Signature, SSL Certificates for web server (CAs issuing SSL certificates are separated from CAs issuing Timestamping or Code Signing certificates), Application Certificates (e.g., e-Invoice, WS-Security), OCSP online validation, Code Signing, Timestamping.

Cross Signing	NEED clarification re: >> This does respect to our subordinates MULTICERT CA 002 and MULTICERT CA 001 wich are, for now, signed by Baltimore as well. QUESTION: Does this mean that the subordinate "MULTICERT CA 002" is signed by both "MULTICERT Root Certification Authority 01" and "Baltimore CybertTrust Root"?	**Verified?**	Need Clarification From CA
Technical Constraint on 3rd party Issuer	Where MULTICERT has a External RA, a procedure is established in order to comply with all our requirements. All the documentation is store by MULTICERT, training is in place as well as all member (Registration Administrator) are dully identified. MULTICERT provided a web interface, where the Registration Administrator need to be authenticate for a new subject registration. External RA's are audited on an annual basis. In the case of External RA's issuing qualified certificates, they are dully registered in the supervisory body (www.gns.gov.pt). > The subordinate CAs who are not part of the MULTICERT organization... Are there any technical constraints on them? It depends on the kind of contract established and the audience of our costumer. They are all obliged to meet our CPS requirements. We don't have, for now, any Subordinate CA which is not part of MULTICERT Organization.	**Verified?**	Verified

Verification Policies and Practices
