Summary of the audit requirements for ETSI TS 101 456

The ETSI TS 101 456 specification contains the following requirements:

1 Certification Practice Statement (CPS)

The CA has a presentation of its practices and policies.

2 Public Key Infrastructure – Key Management life cycle

The CA ensures that CA keys are created under controlled conditions.

The CA ensures that private CA Keys are treated confidentially and that their integrity is maintained.

The CA ensures that the integrity and authenticity of the (published) CA public keys together with all associated parameters are preserved.

The CA doesn't not generate nor store private signature keys of the certification owner (subject).

3 Public Key Infrastructure – certificate management life cycle

The CA ensures that the subjects are properly identified and authenticated, and that the subject certificate requests are complete, accurate and duly authorized.

The CA ensures that requests for certificate issued to a subject who already previously been are complete, accurate and duly authorized.

The CA ensures that it issues certificates securely to maintain their authenticity.

The CA ensures that the terms and conditions are made available to subscribers and relying parties.

The CA ensures that certificates are made available as necessary to subscribers, subjects and relying parties.

The CA ensures that certificates are revoked in a timely manner based on authorized and validated certificate revocation requests.

The CA ensures that all subjects are informed for all change of status of their certificates.

The CA ensures the CRL issuance as least daily.

4 CA Management and Operation

The CA ensures that the applied administrative and management methods are appropriate and correspond to acknowledged standards.

The CA ensures that the objects and information worthy of protection receive an appropriate protection.

The CA ensures that the employees and the hiring procedures amplify and support the CA company's trustability.

The CA ensures that physical access to critical services is controlled and that the physical risks for the objects worthy of protection are minimized.

The CA ensures that the CA systems are operated safely, according to specification.

The CA ensures that the access to the CA systems is restricted to appropriate, authorized persons.

The CA is to use trustworthy systems and products that are protected against modifications.

The CA ensures that in case of a catastrophe the operation is restored as soon as possible.

The CA ensures that in case of a cessation of the CA operation the potential interference of users (subscriber) and relying parties is minimized and that the continued maintenance of records that are required as proof of certification in legal proceedings is given.

Autoridade Nacional de Segurança

The CA ensures that statutory requirements are met.

The CA ensures that all relevant information of a certificate is recorded for a reasonable period of time, especially for the purpose of proof of certification in legal proceedings.

5. Organization

The CA ensures that its organization is reliable.

6. Additional requirements

The CA allows third parties to check and test their certificates.
