

NOTES -

- 1 **What's This.** Display "What's This?" as a dotted-line link. See Marketplace Styleguide (bottom of page):

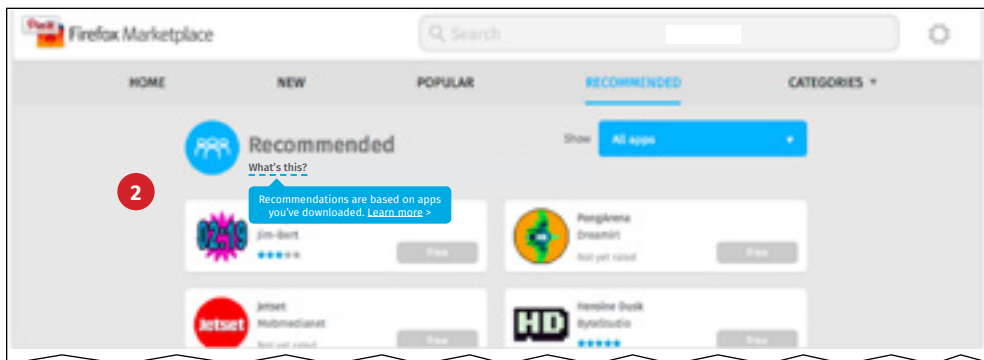

<http://marketplaceux.github.io/marketplace-style-guides/forms.html>

User hovers over link to see Tooltip in #2.

- 2 **What's This - Hover.** Display Tooltip content here.

User needs to be able to click the "learn more" link. So the Tooltip should be timed to allow user to hover off "what's this?" to get to the link.

In styleguide, Tooltip is shown above the form label. Here it may work better below so that it doesn't cover up the title (Recommended) to which it refers.
