Current:

Revised:

Changes:

- Change string to "Let's talk about:"
- Use favicon instead of image
- Put page info inside box

Current:

Revised:

Changes:
- Use favicon instead of image.
- Make "Let's Talk About:" bold and #999999 (same colour for Edit/ Close icons)
- Make favicon, page title and URL all clickable.
- Font size 10pt
- Make rounded corners of "Name this conversation" box 4px (to match sharing buttons)
- Make "Name this Conversation 12pt and not bold.

Current:

Conversation 2

Revised:

Conversation 2

Let's Talk About:

We're building a better Internet – Mozilla
www.mozilla.org
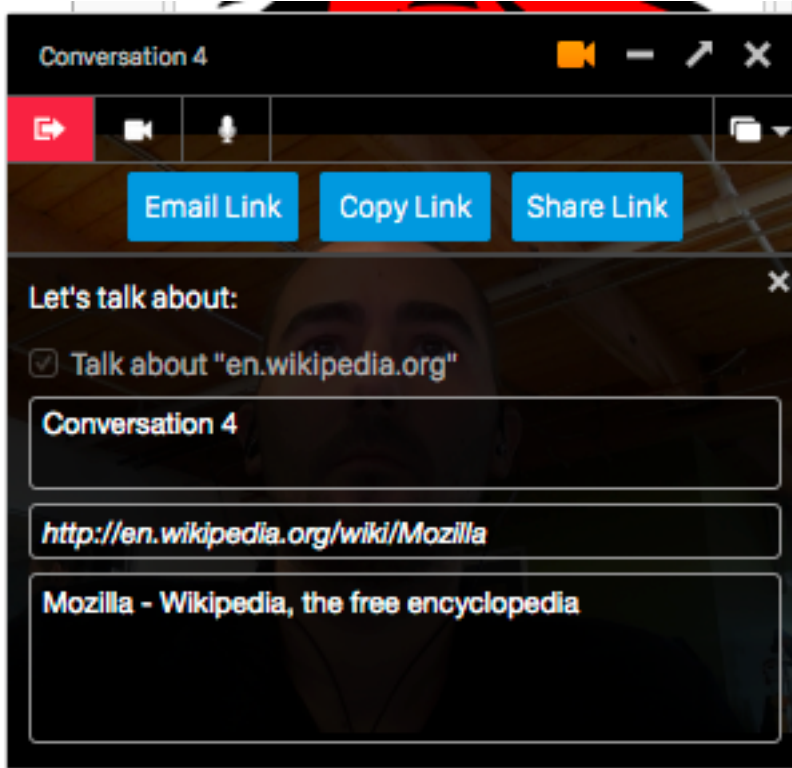

Changes:
- Conversation title bold, white, 12pt
- Rest of text 11pt
- "Let's Talk About:" is #999999
- Favicon, page title and page URL are all clickable

Current:

Changes:

- Remove share buttons, and make edit panel full height. I don't think anyone will be sharing from this screen.
- Let's talk about and X = #999999
- Added save button to close Edit mode, because it didn't feel clear to me that once you typed you had to go to the X.
- Larger checkbox (same size as box in conversation panel)
- Spacing between boxes, and box heights are changed slightly
- Page title instead of URL next to checkbox; removed "Talk about" next to the check box as well since it is redundant.
- URL is now not underlined and not italic; now blue.
- Dropdown URLBar stuff not working in this initial version?
- If user checks box to talk about current page, the URL should auto-populate into the URL field and that field should be disabled. A user will have to uncheck the box to be able to edit the URL again.
