

**Code allocation.** The characters proposed only take up two rows, however due to the existence of several shogi variations that require other pieces, it is wise to save up some space for future proposals. So, we recommend to make the block 6 rows wide, in the range: 1FC00-1FC5F. Making it that wide is necessary in order to accommodate the most popular variant: Chu Shogi, which includes up to 40 unique extra pieces (including both players). The block could be called "Shogi pieces" or a broader term would be "Chess symbols extended A".
