Opens a browser tab!

I feel like I've seen this UI before...

about:debugging?runtime=flame&type=usb&app=music

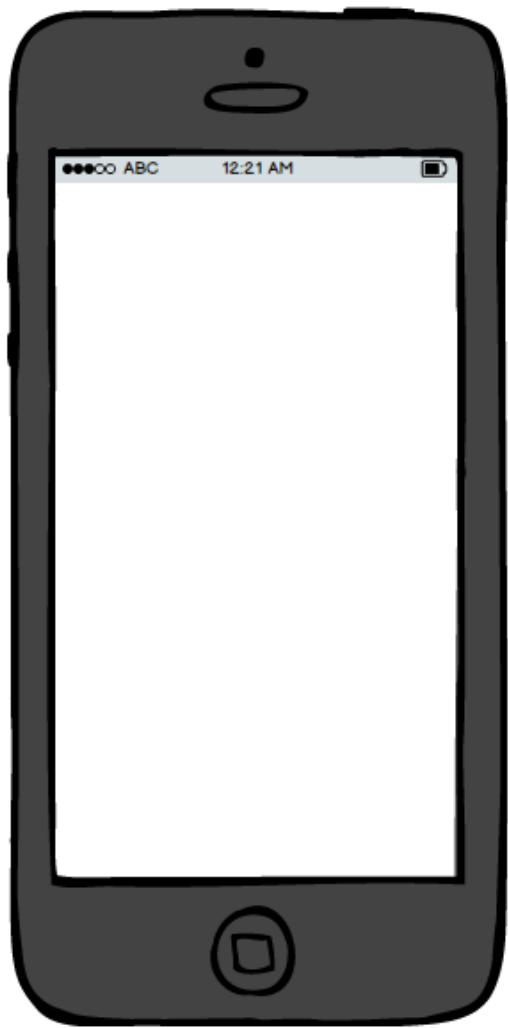

Local Firefox: Devices | Flame Device: Apps | Flame Device: Music App

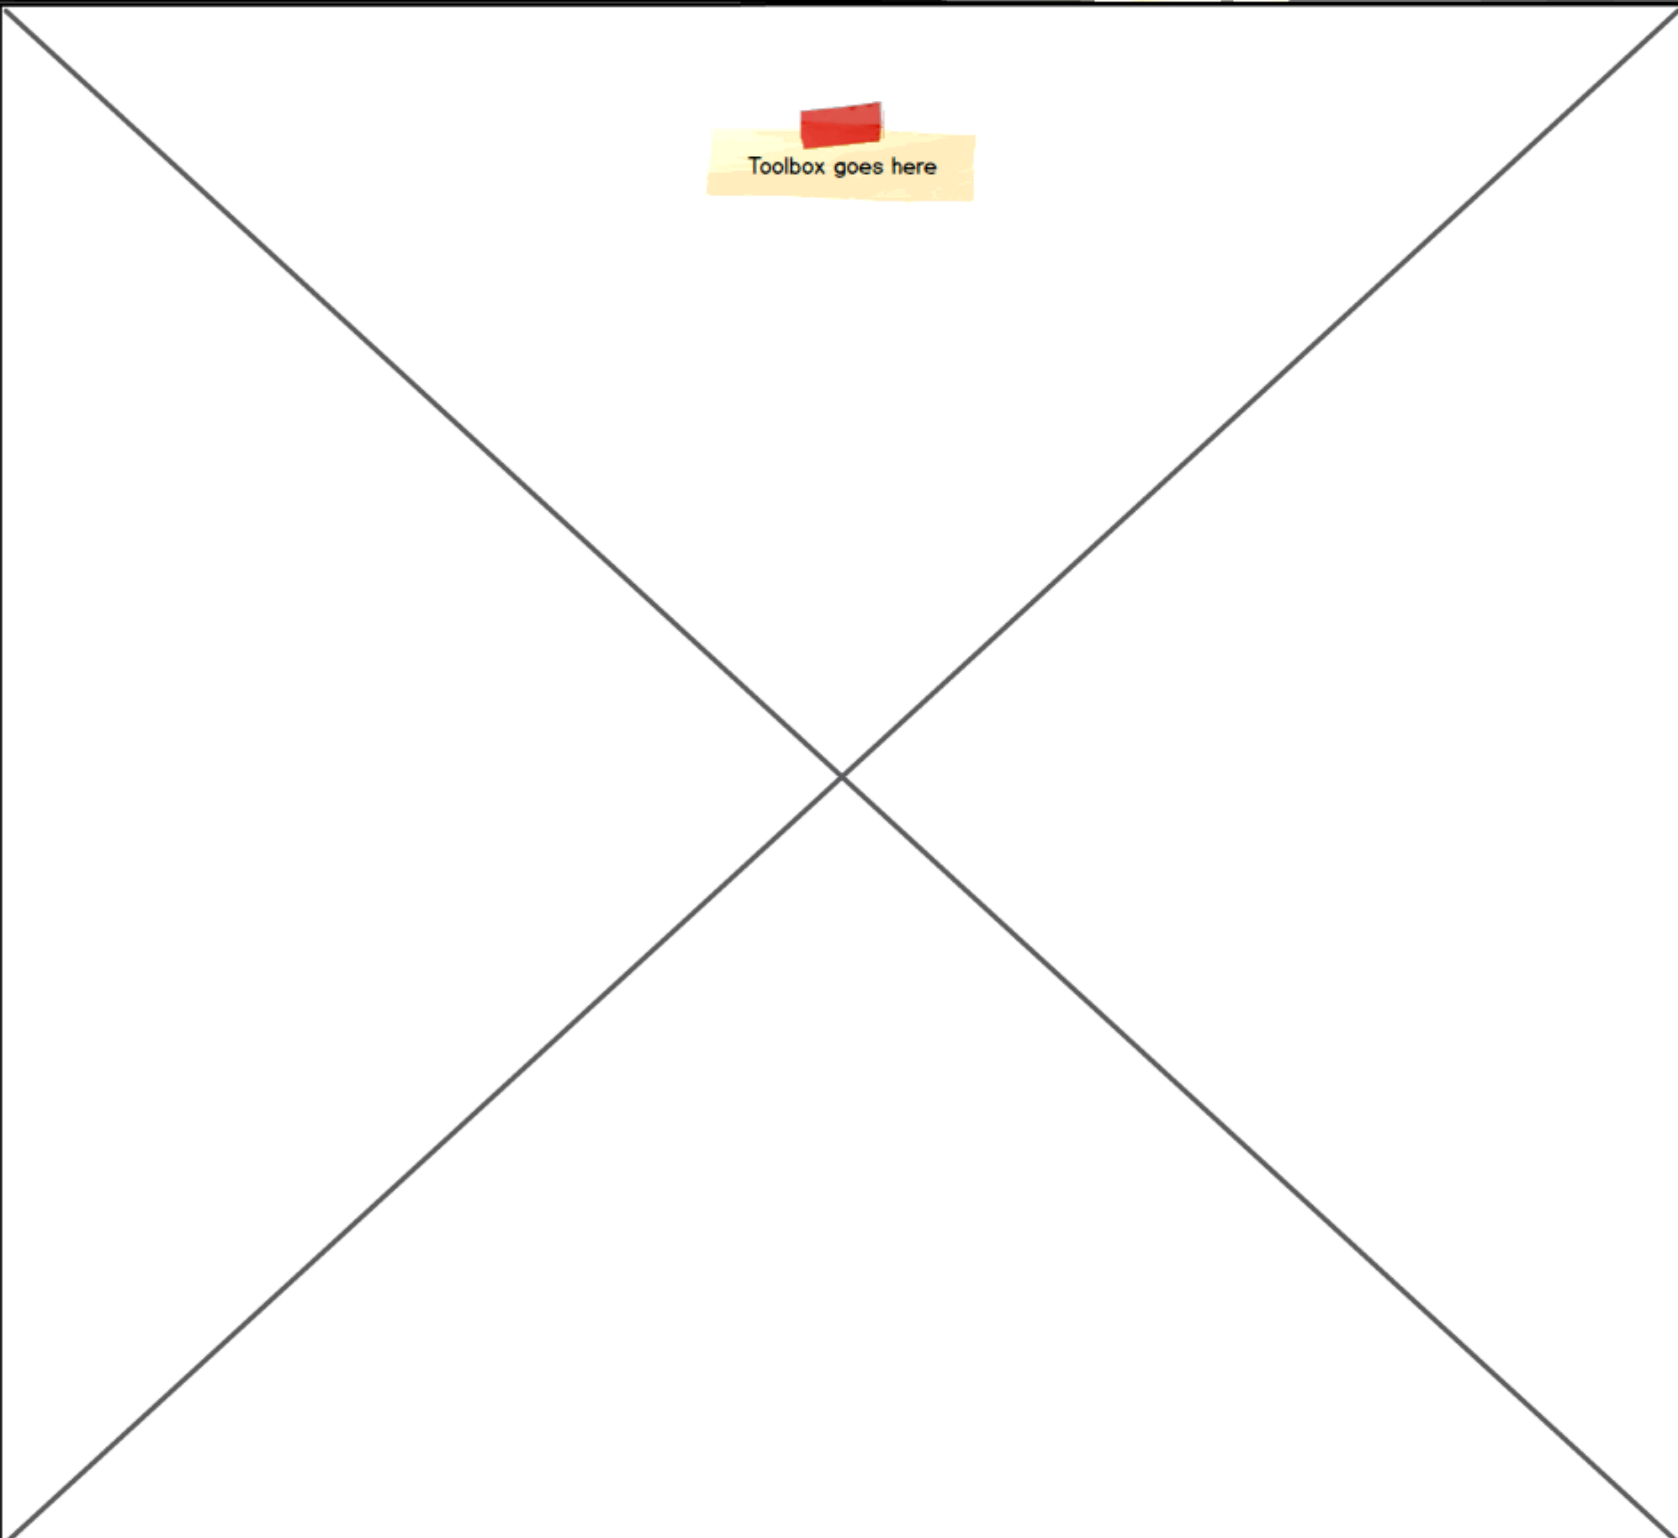

Currently debugging the Music app on your Flame device via USB connection

App info added, also bookmarkable
New, separate device connection from any other tabs
(Could be app origin instead of "music")

One day, we'll stream
the device screen

Toolbox goes here

about:debugging?runtime=flame&type=usb&app=music

Local Firefox: Devices | Flame Device: Apps | Flame Device: Music App

Lost connection to the Music app on your Flame device!

If the connection dies unexpectedly, update this bar
