

---

Find out the login data and password in an old harddisk /or a hacked pc

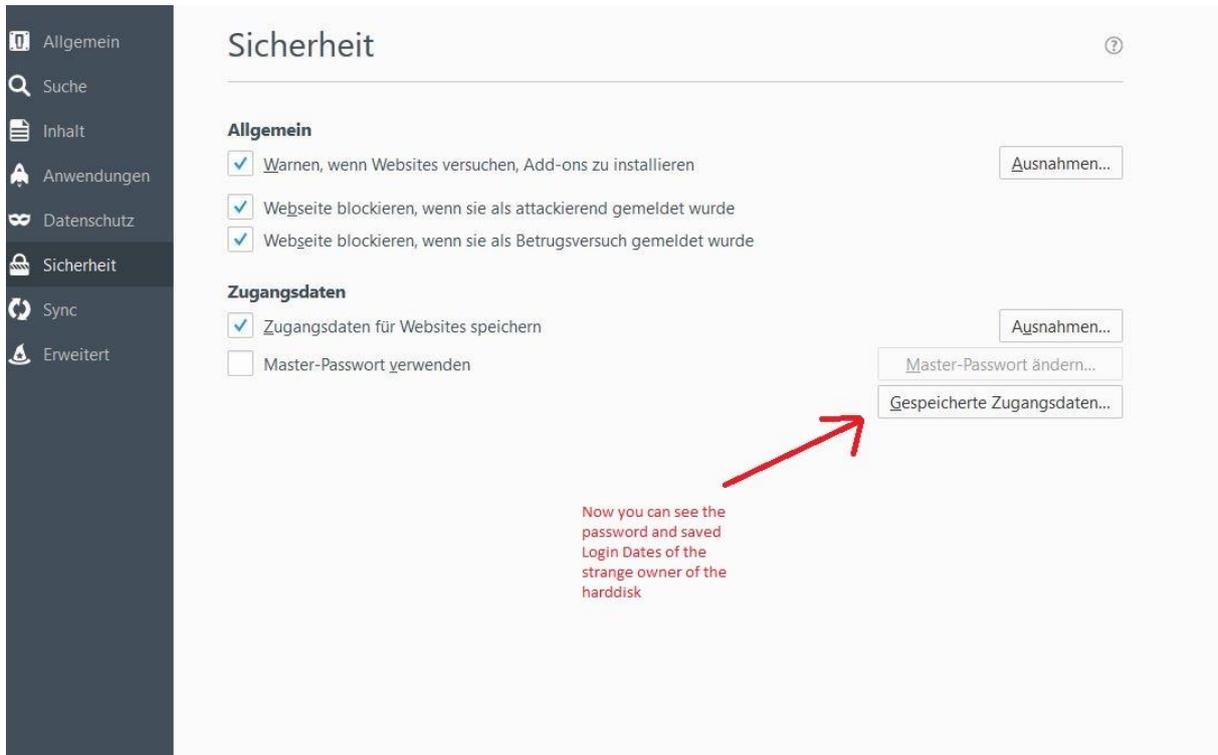

---

1. Step find out the two files logins.json and 3key.db on the external or stranger harddisk. Normally it will be in the directory  
<F:\Users\XXXXXXXXX\AppData\Roaming\Mozilla\Firefox\Profiles\qkfnjcoc.default>
2. Copy the two files logins.js and key3.db

3. After copy this files going to the own directory:  
<F:\Users\XXXXXXXXX\AppData\Roaming\Mozilla\Firefox\Profiles\qkfnjcoc.default>  
and replace the 2 files with the stranger profile.

4. Now restart firefox again and looking in to the security settings of firefox.

5. Normally if the owner use the automatic password and login data saving (a lots of people do this) so we get a big chance to see this passwords and login data.
