			Update current/redesigned content handling flow chart
			Add project briefing
V 1.1	JUN 23, 2016	Morpheus, Bryant	Put “pause” feature back to contextual menu
			Edit native app for protocol

Release Notes

V 1.2 JUL 07, 2016 Morpheus, Bryant

Update copy strings, find more details here: <https://goo.gl/lixc90>

Update 5.4.2 for unknown size download

Create 5.8 Duplicate downloads

Remove all “Add-on” in file handler section

Update 6.5 for “Always Ask” and Edit for OS default application

Create 6.6 for special cases, including web feed, podcast, etc

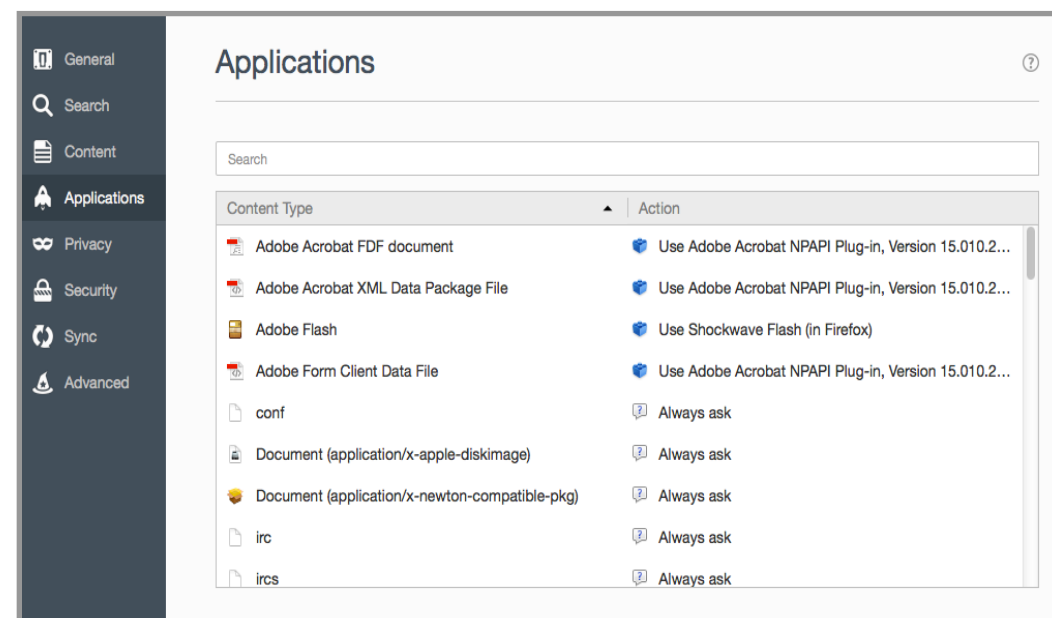

OVERVIEW

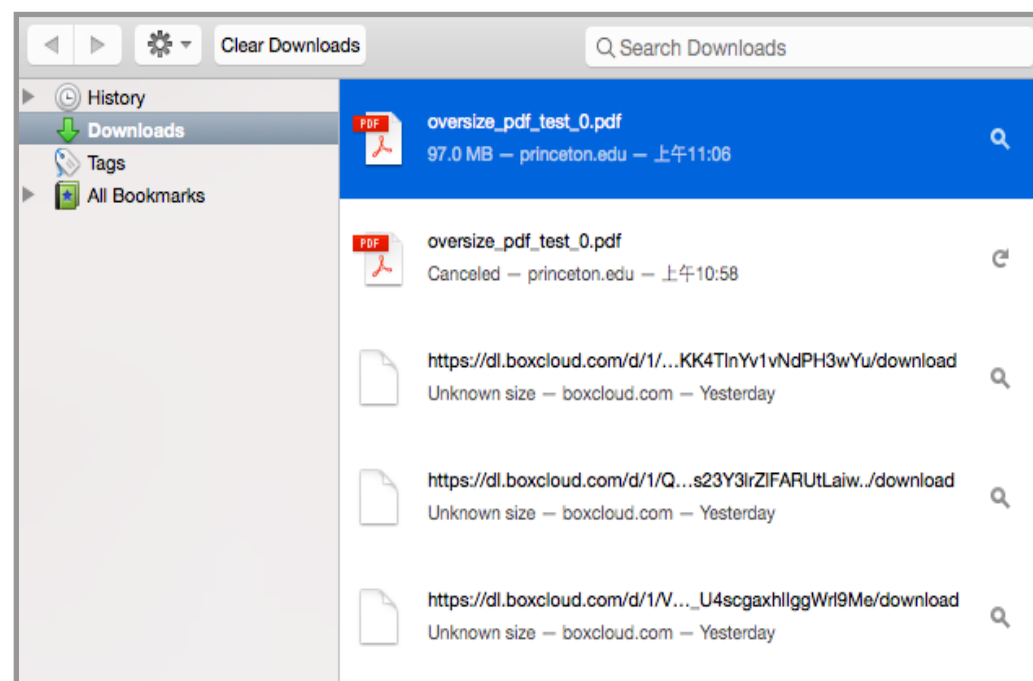

Download panel

The section includes the UX details for download icon on toolbar, download panel and all download status. The design principle is to provide the most important information and useful actions for entire download flow.

Applications

The section includes the UX details for file handlers, protocol handlers and advanced settings. Content handler provides specific configurations for user to control the default settings for different files and protocols.

Download library (Out of scope)

The section contains the UX details for download manager. Download manager is another space to provide user not only entire download history but also more actions than download panel.

Note: it is planned to blend into activity stream

Project Briefing

*Streamline the experience of utilizing the web content,
but do not lose the flexibility Firefox has by keeping advanced options in context.*

OVERALL

- *Access to content as fast as possible*
- *Raise the awareness of overall content handling process*
- *Do what the web do best and handover tasks to OS if it can do better*
- *Information and actions should be delivered contextually*
- *Make the default action easy, the advanced powerful*

FILE

- *Preview the file in the browser as long as we can. otherwise download it directly*
- *Make concurrent downloads in summary more visible*
- *Allow users to use different handlers to render files on browser*

PROTOCOL

- *Only request users' attention if there is no available handler to open the protocol*
- *Make handler of preference more visible and understandable*
- *Allow users to set applications as specified handler in one click*

Term Specification

DOWNLOAD PANEL

Download Flow on Toolbar

Start Download

- 1. Pop out download notification immediately
- 2. Hide the download notification after 5 seconds

Hover for Actions

When hovering on the notification, it functions as the items within the download panel, please refer to “Hover for More” section for all hover state.

Downloading

- 1. While downloading, show progress bar on download icon
- 2. Multiple files downloading, show overall progress

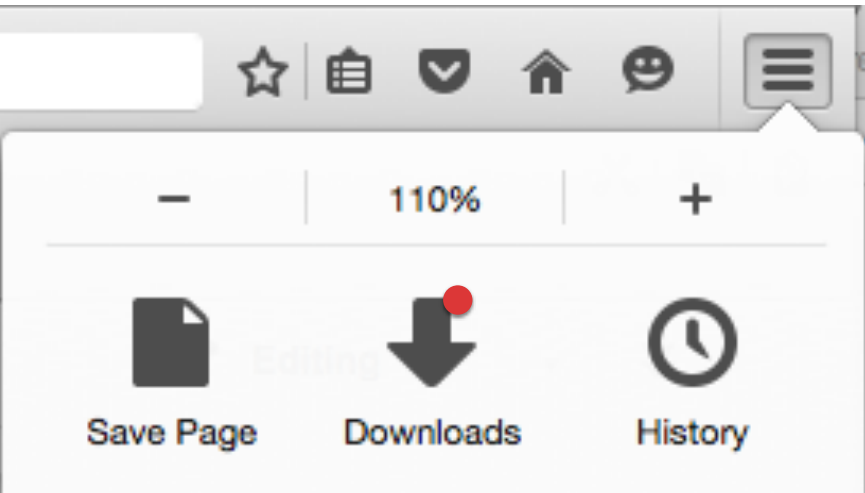

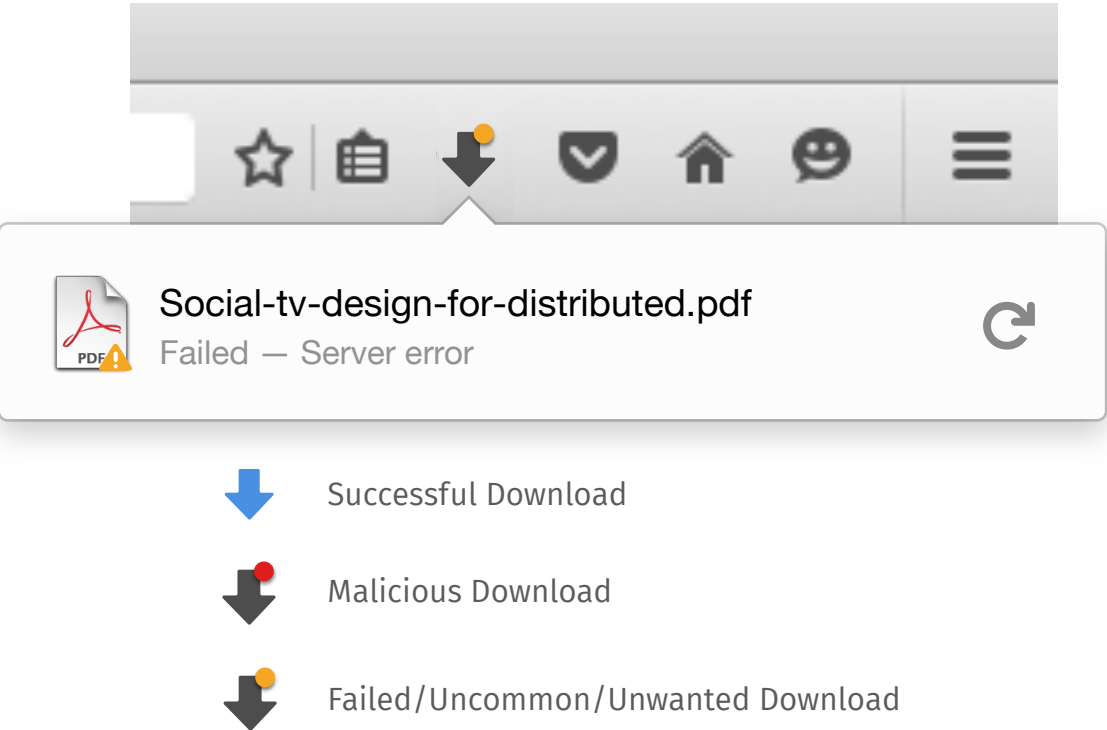

Download Complete

Once there is a download completed, show expanding/flashing transition to notify the user, and keep the progress bar running if there are more downloadings

Download Alert as Badges

Alert: Failed/ Malware/ Unwanted/ Uncommon

When a user downloads a file, the status of the download is show in the toolbar.

1. Pop out download notification immediately
2. Hide the download notification after 5 seconds
3. The alert badge will disappear when user click on it to find more detail
4. Whenever an alert, show alert badge

Grouped Alert

When an alert notification hasn't been dismissed and there is more downloads which need to display alert states, the alert notificaitons will be grouped.

For Malware, Uncommon, Unwanted

{1 file blocked}
{<1 +n> files blocked}

For Failed

{1 file failed}
{<1 +n> files failed}

For Grouped Notification with blocked and failed both, place blocked first, then failed:

{1 file blocked, 5 files failed}
{2 files blocked, 1 file failed}

Download icon in the Menu Panel

If the download icon has been moved to the menu panel the badges appear on the menu icon.

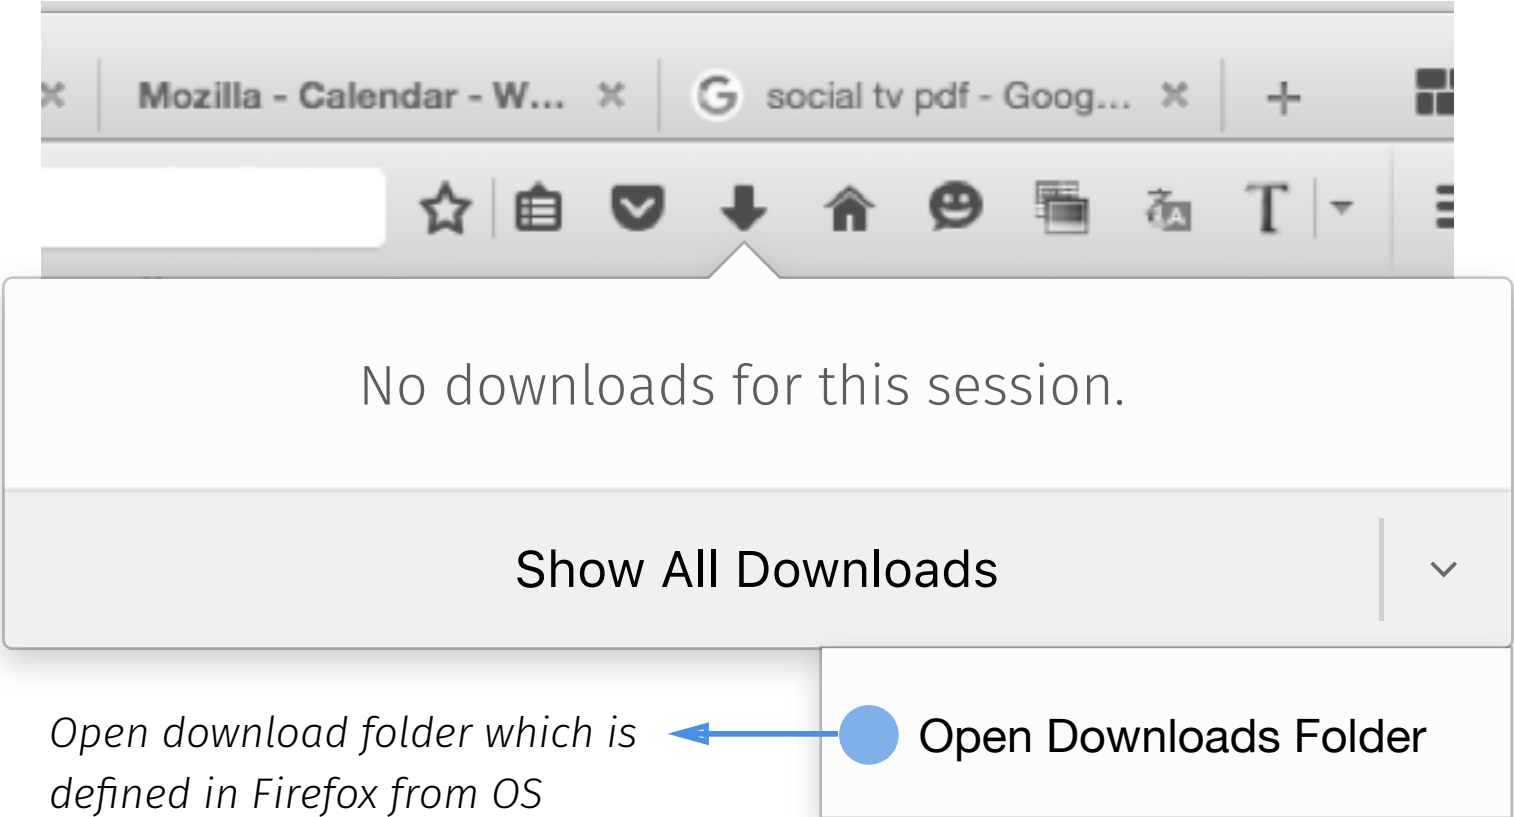

If there is a browser update available at the same time, the download badging will supercede the update icon on the menu. Once the menu is opening, the badging can disappear after.

When Menu is open

When the menu is open, the badge can be seen on the download icon.

Download Icon on Toolbar

Click Download Icon

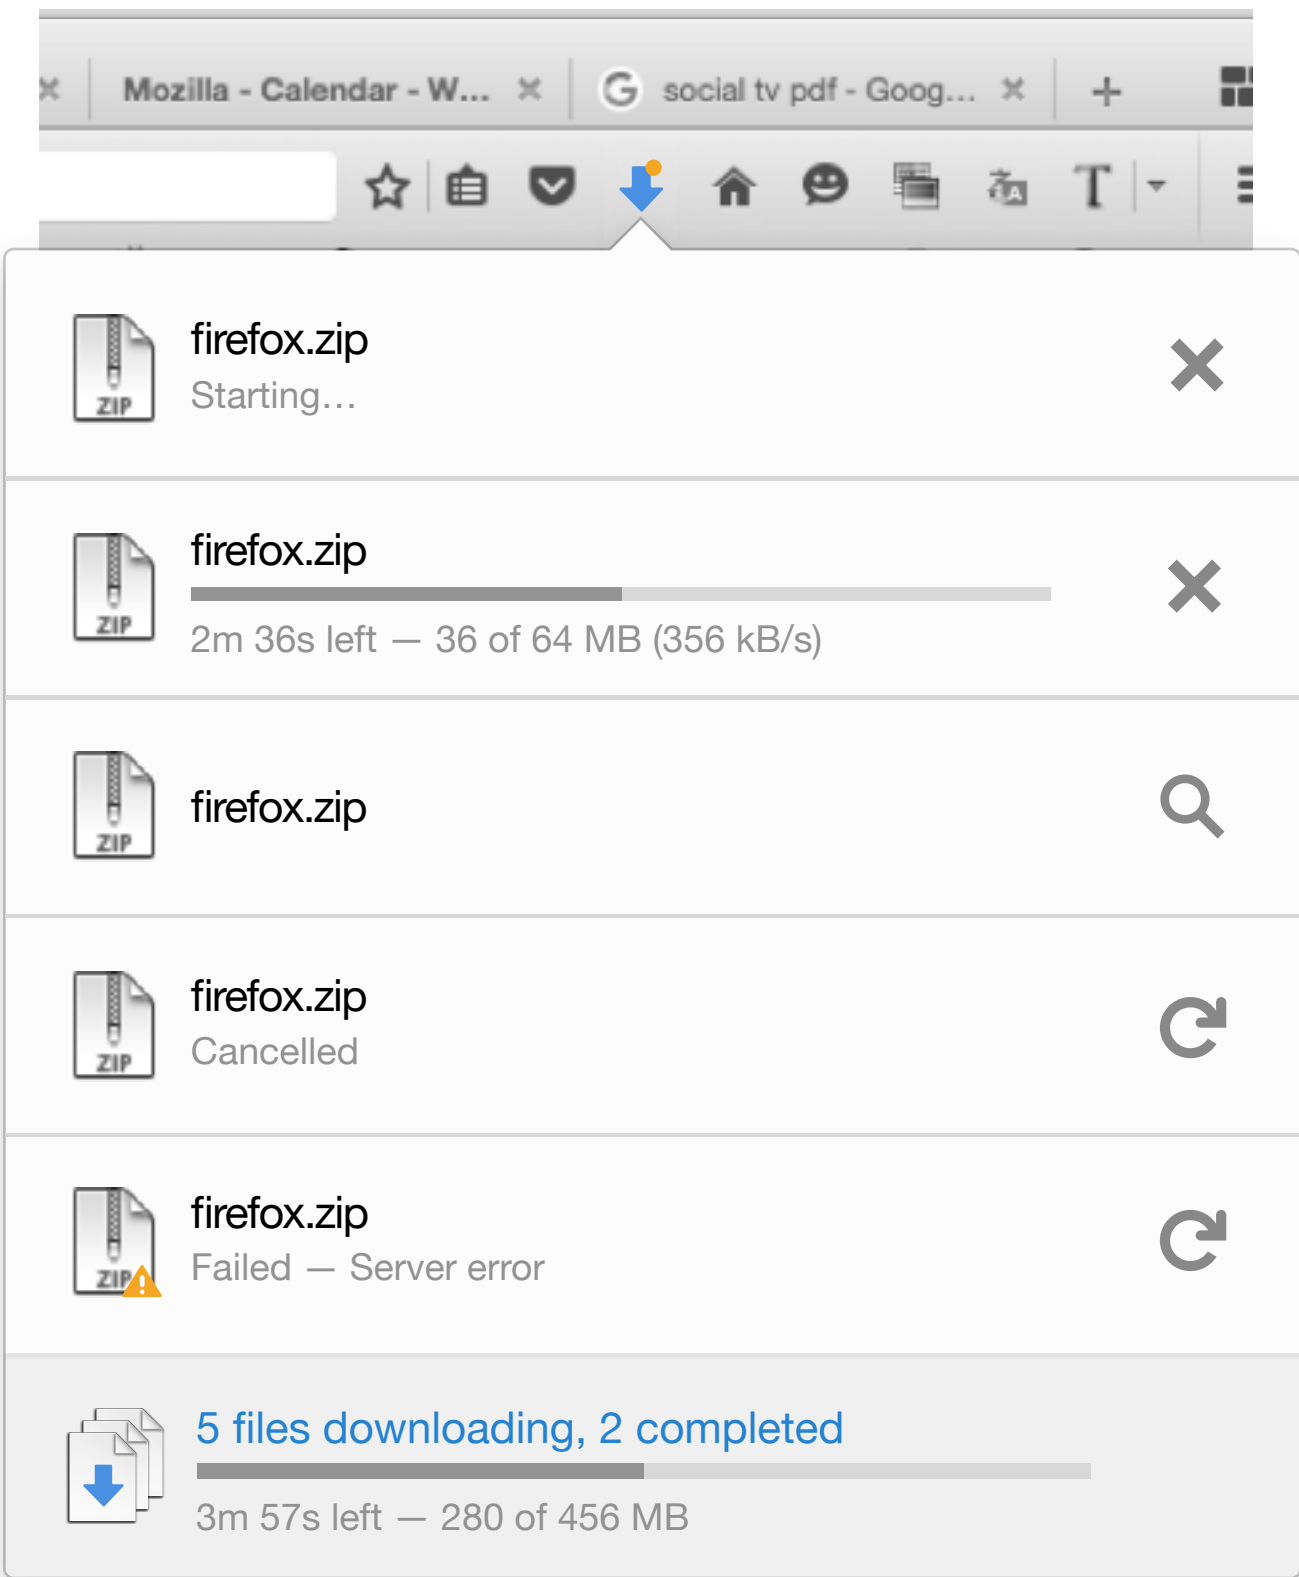

- 1. Show entire download panel
- 2. Hide if user click outside of the download panel

Max numbers of download items displayed at the same time: 5

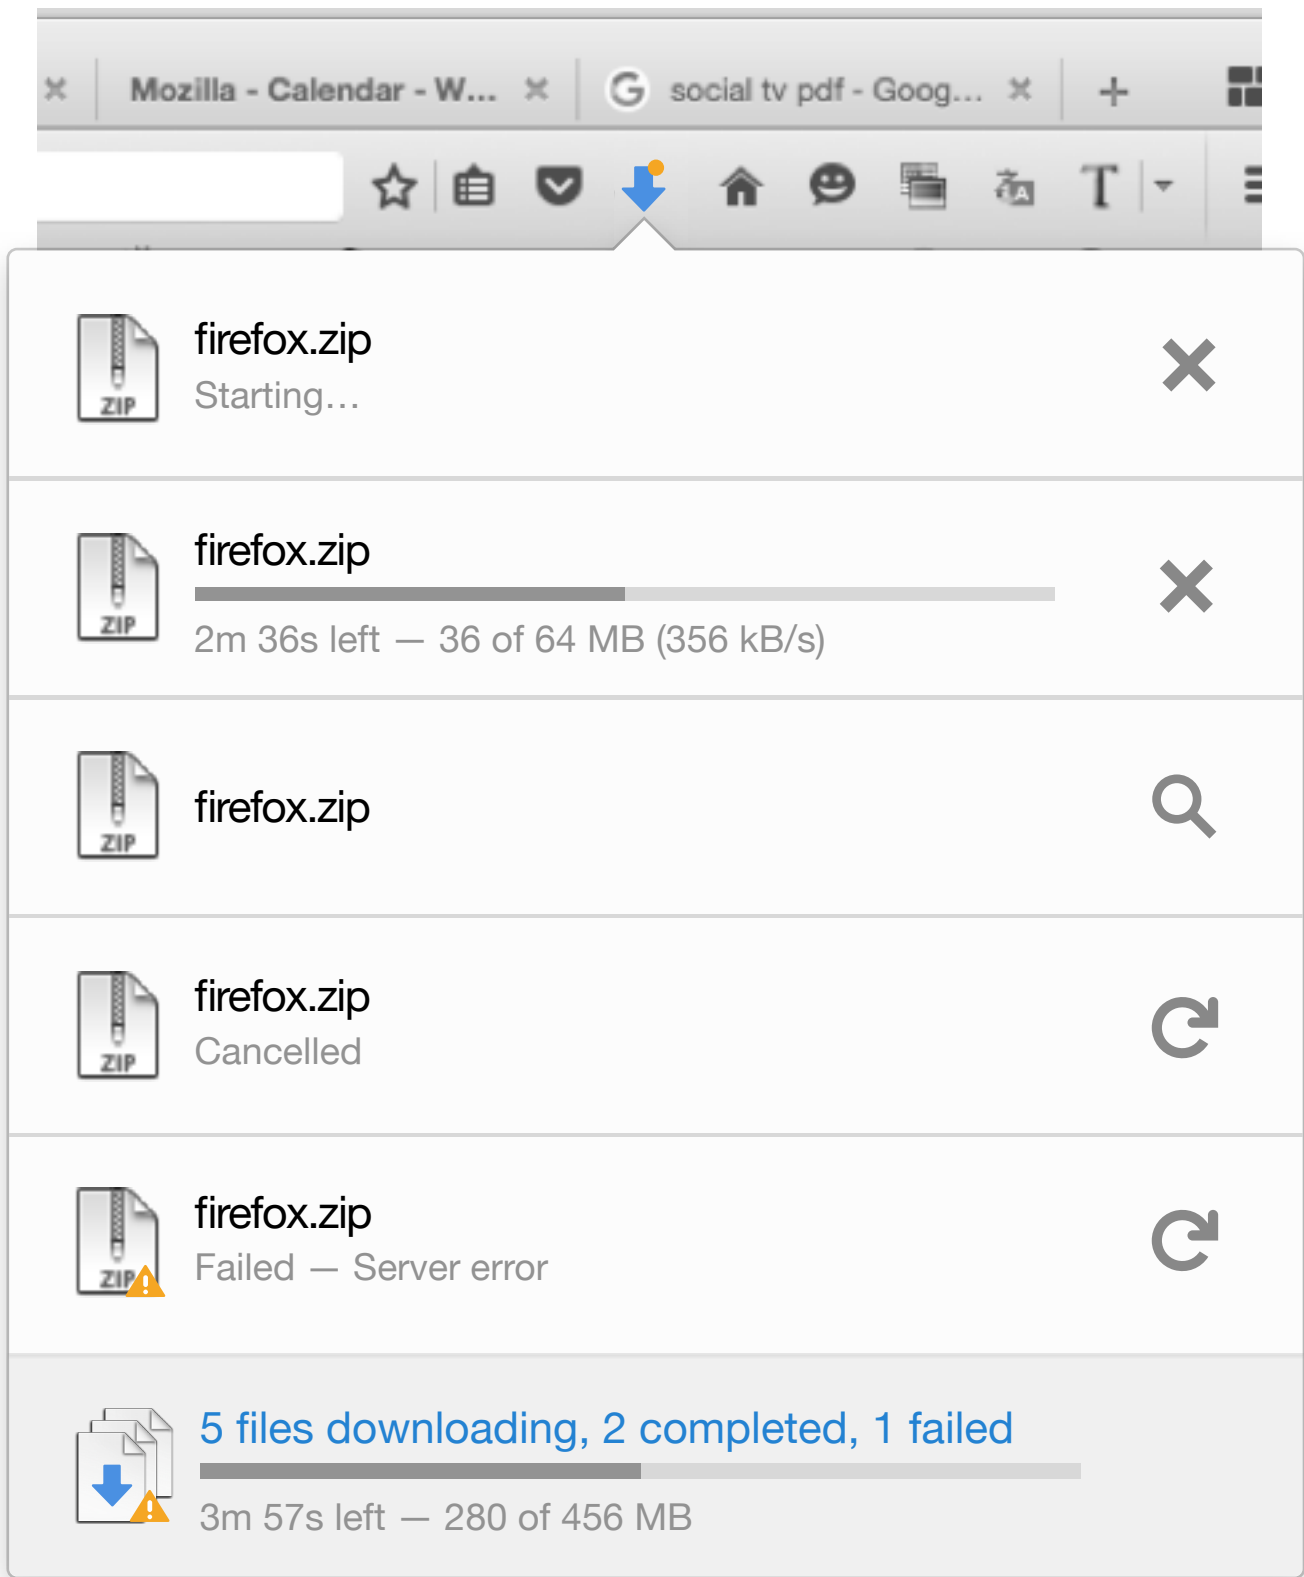

Download Multiple Files

Multiple Files Downloading

Multiple Files Downloading and failed

- 1. Only appear when the downloading items are not on the expanded download panel
- 2. Hide if user click outside of the download panel

When cursor hovers on, show more options

Rules for ETA

$4\text{ s} > \text{ETA}$, show **A few seconds remaining**

$4\text{ mins} > \text{ETA} > 4\text{ s}$, show **Xm Xs remaining**

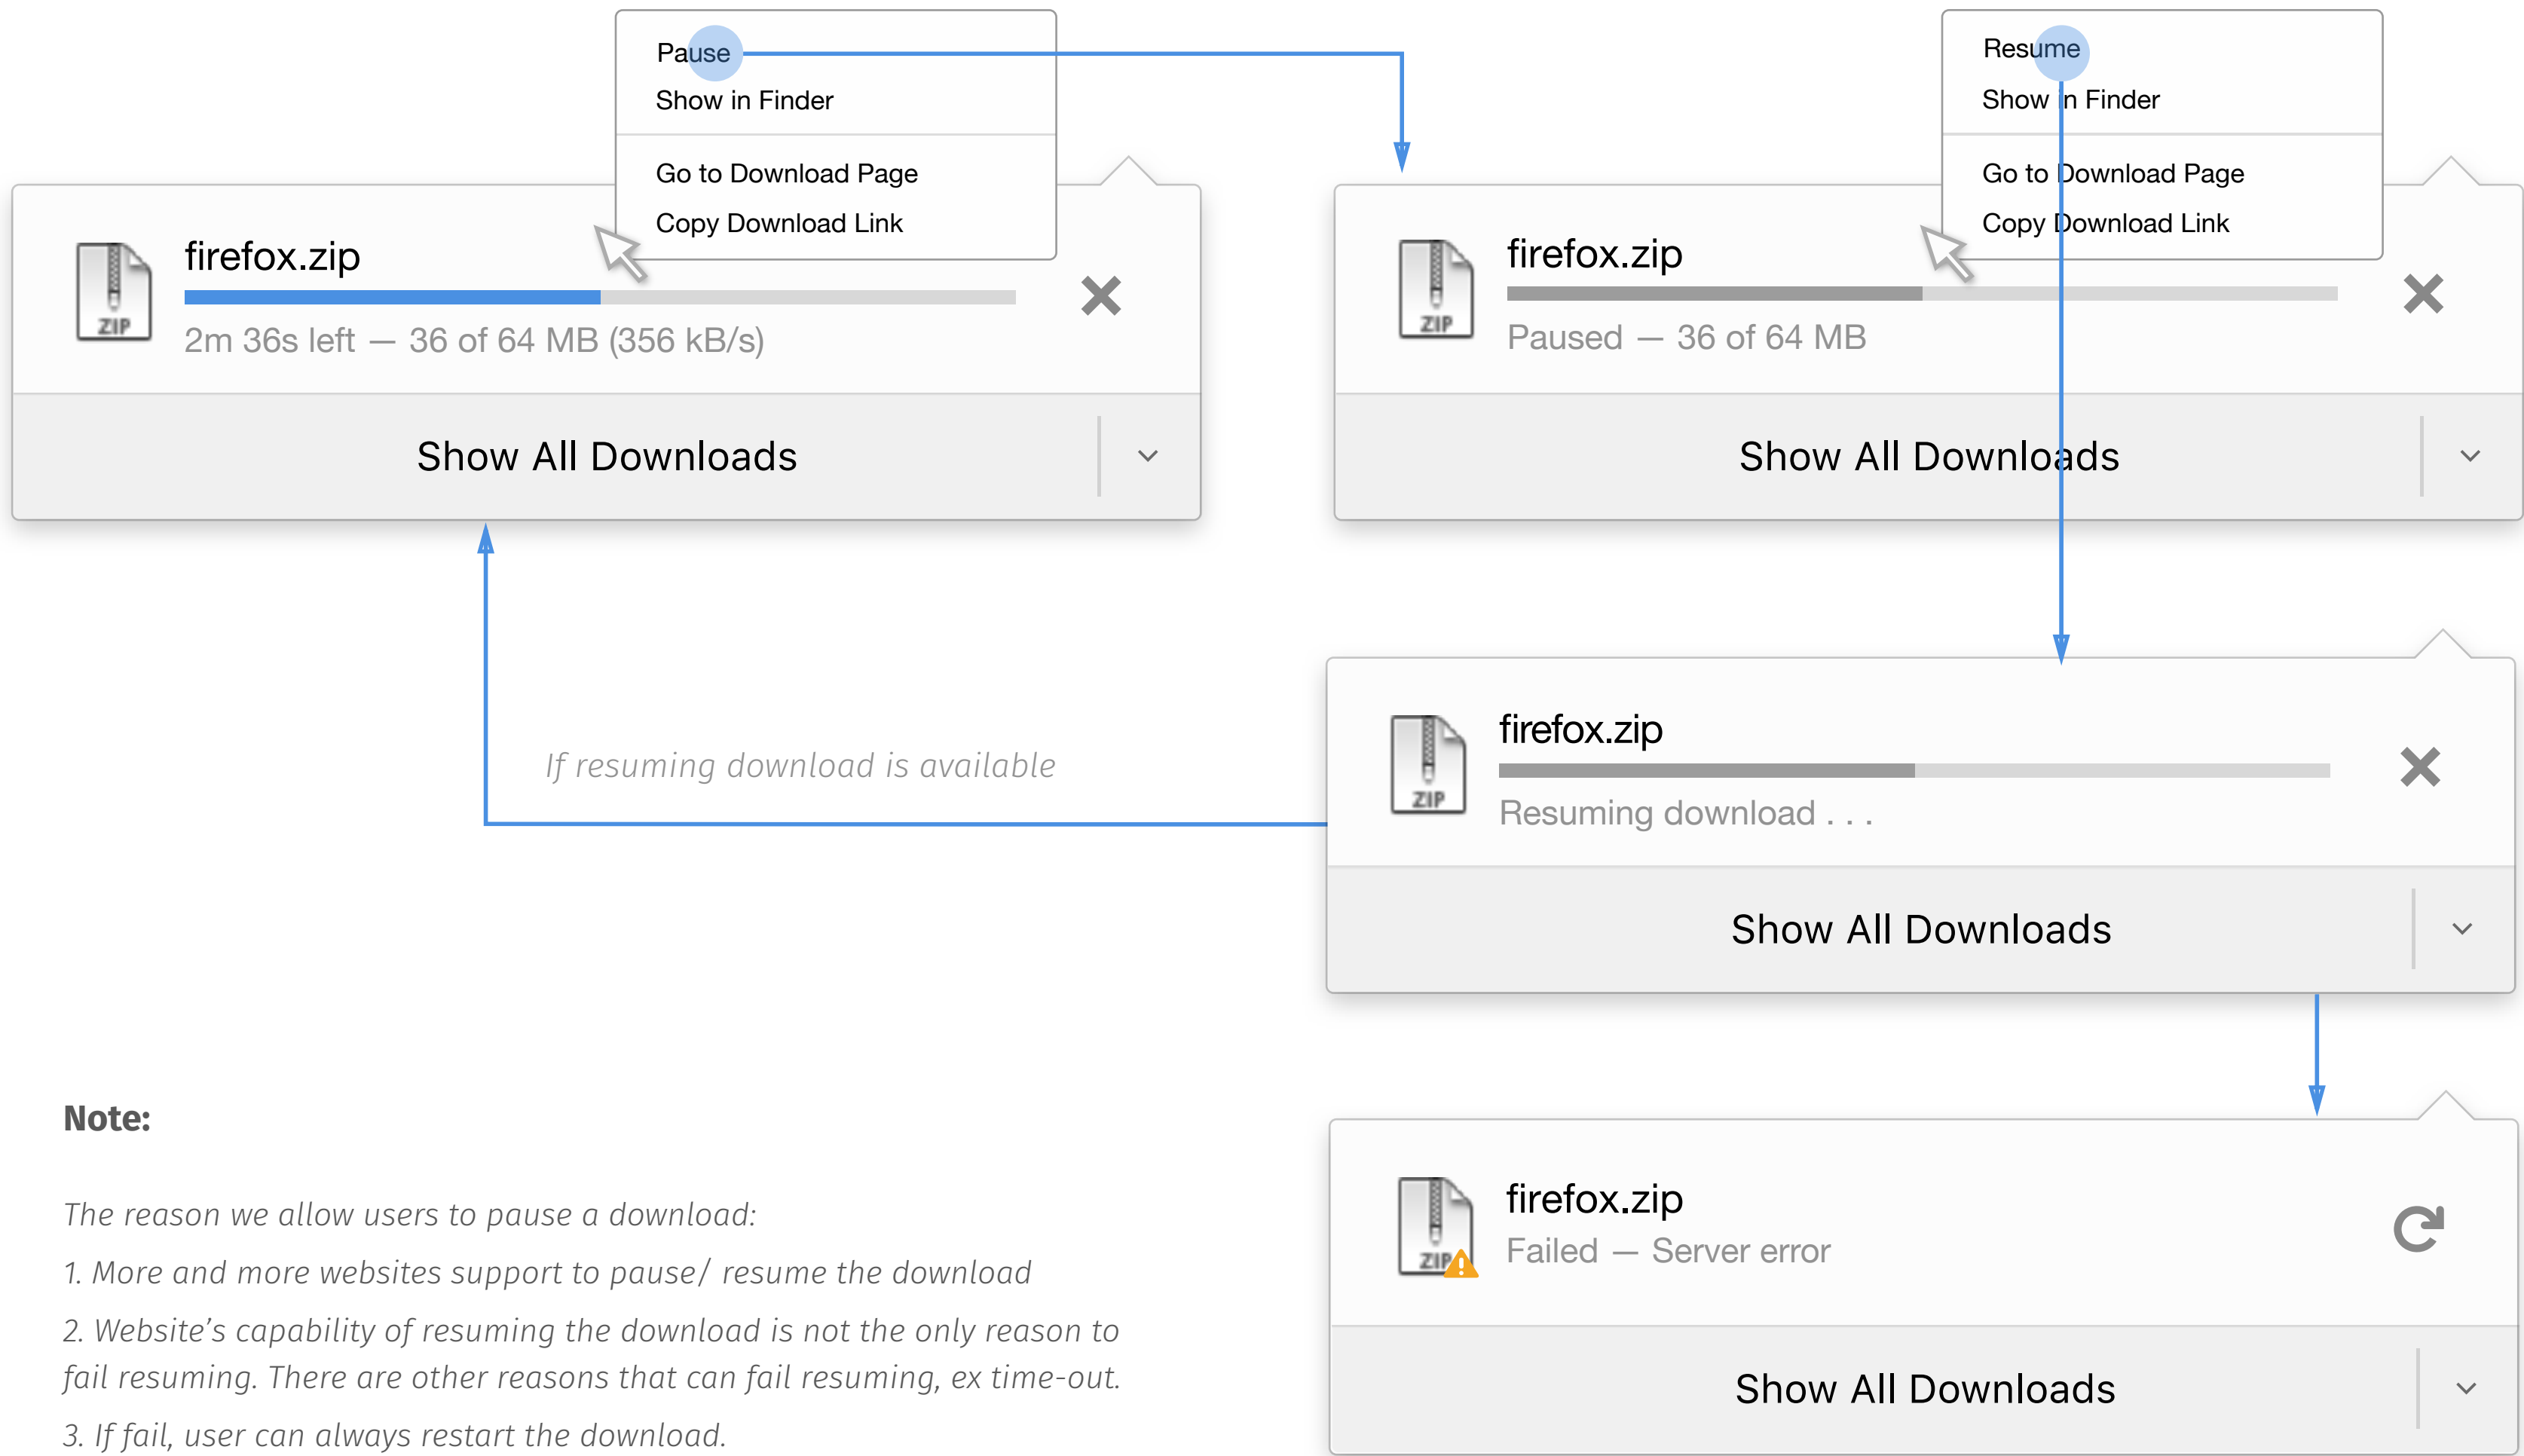

$60\text{ mins} > \text{ETA} > 4\text{ mins}$, show **Xm remaining**

$\text{ETA} > 60\text{ mins}$, show **Xh remaining**

Unknown Size:

Pause & Resume

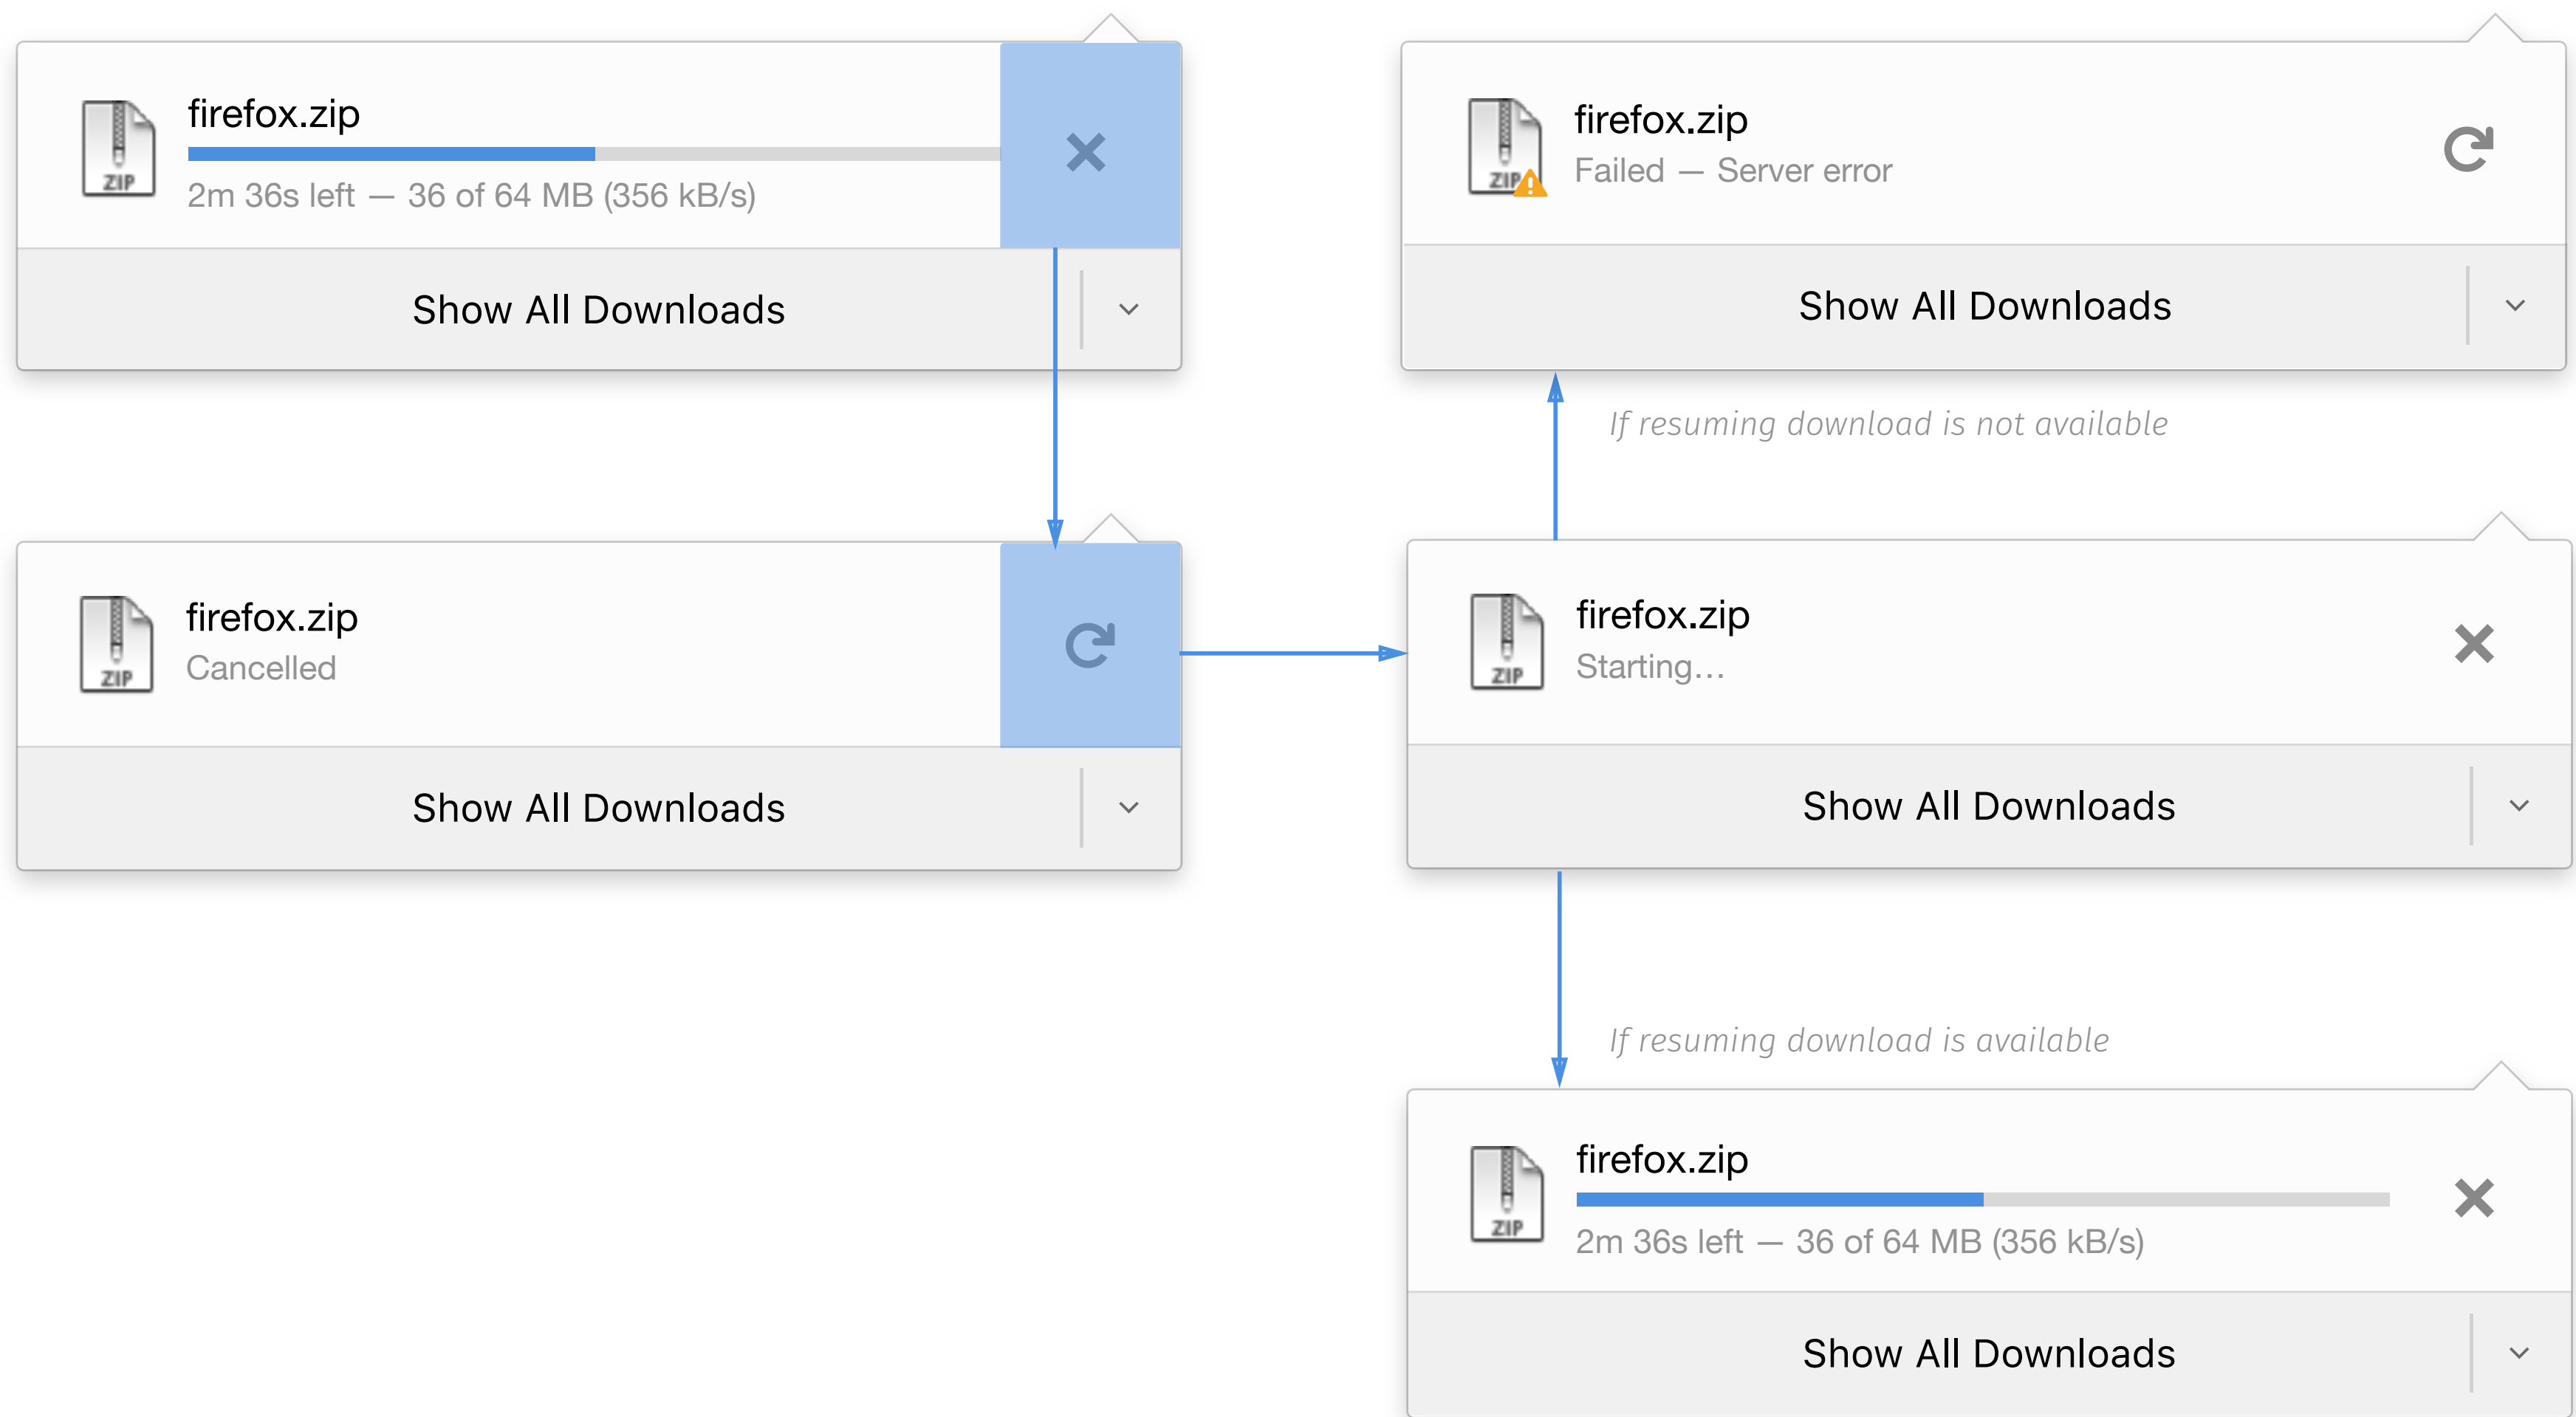

Note:

- The reason we allow users to pause a download:
1. More and more websites support to pause/ resume the download
 2. Website's capability of resuming the download is not the only reason to fail resuming. There are other reasons that can fail resuming, ex time-out.
 3. If fail, user can always restart the download.

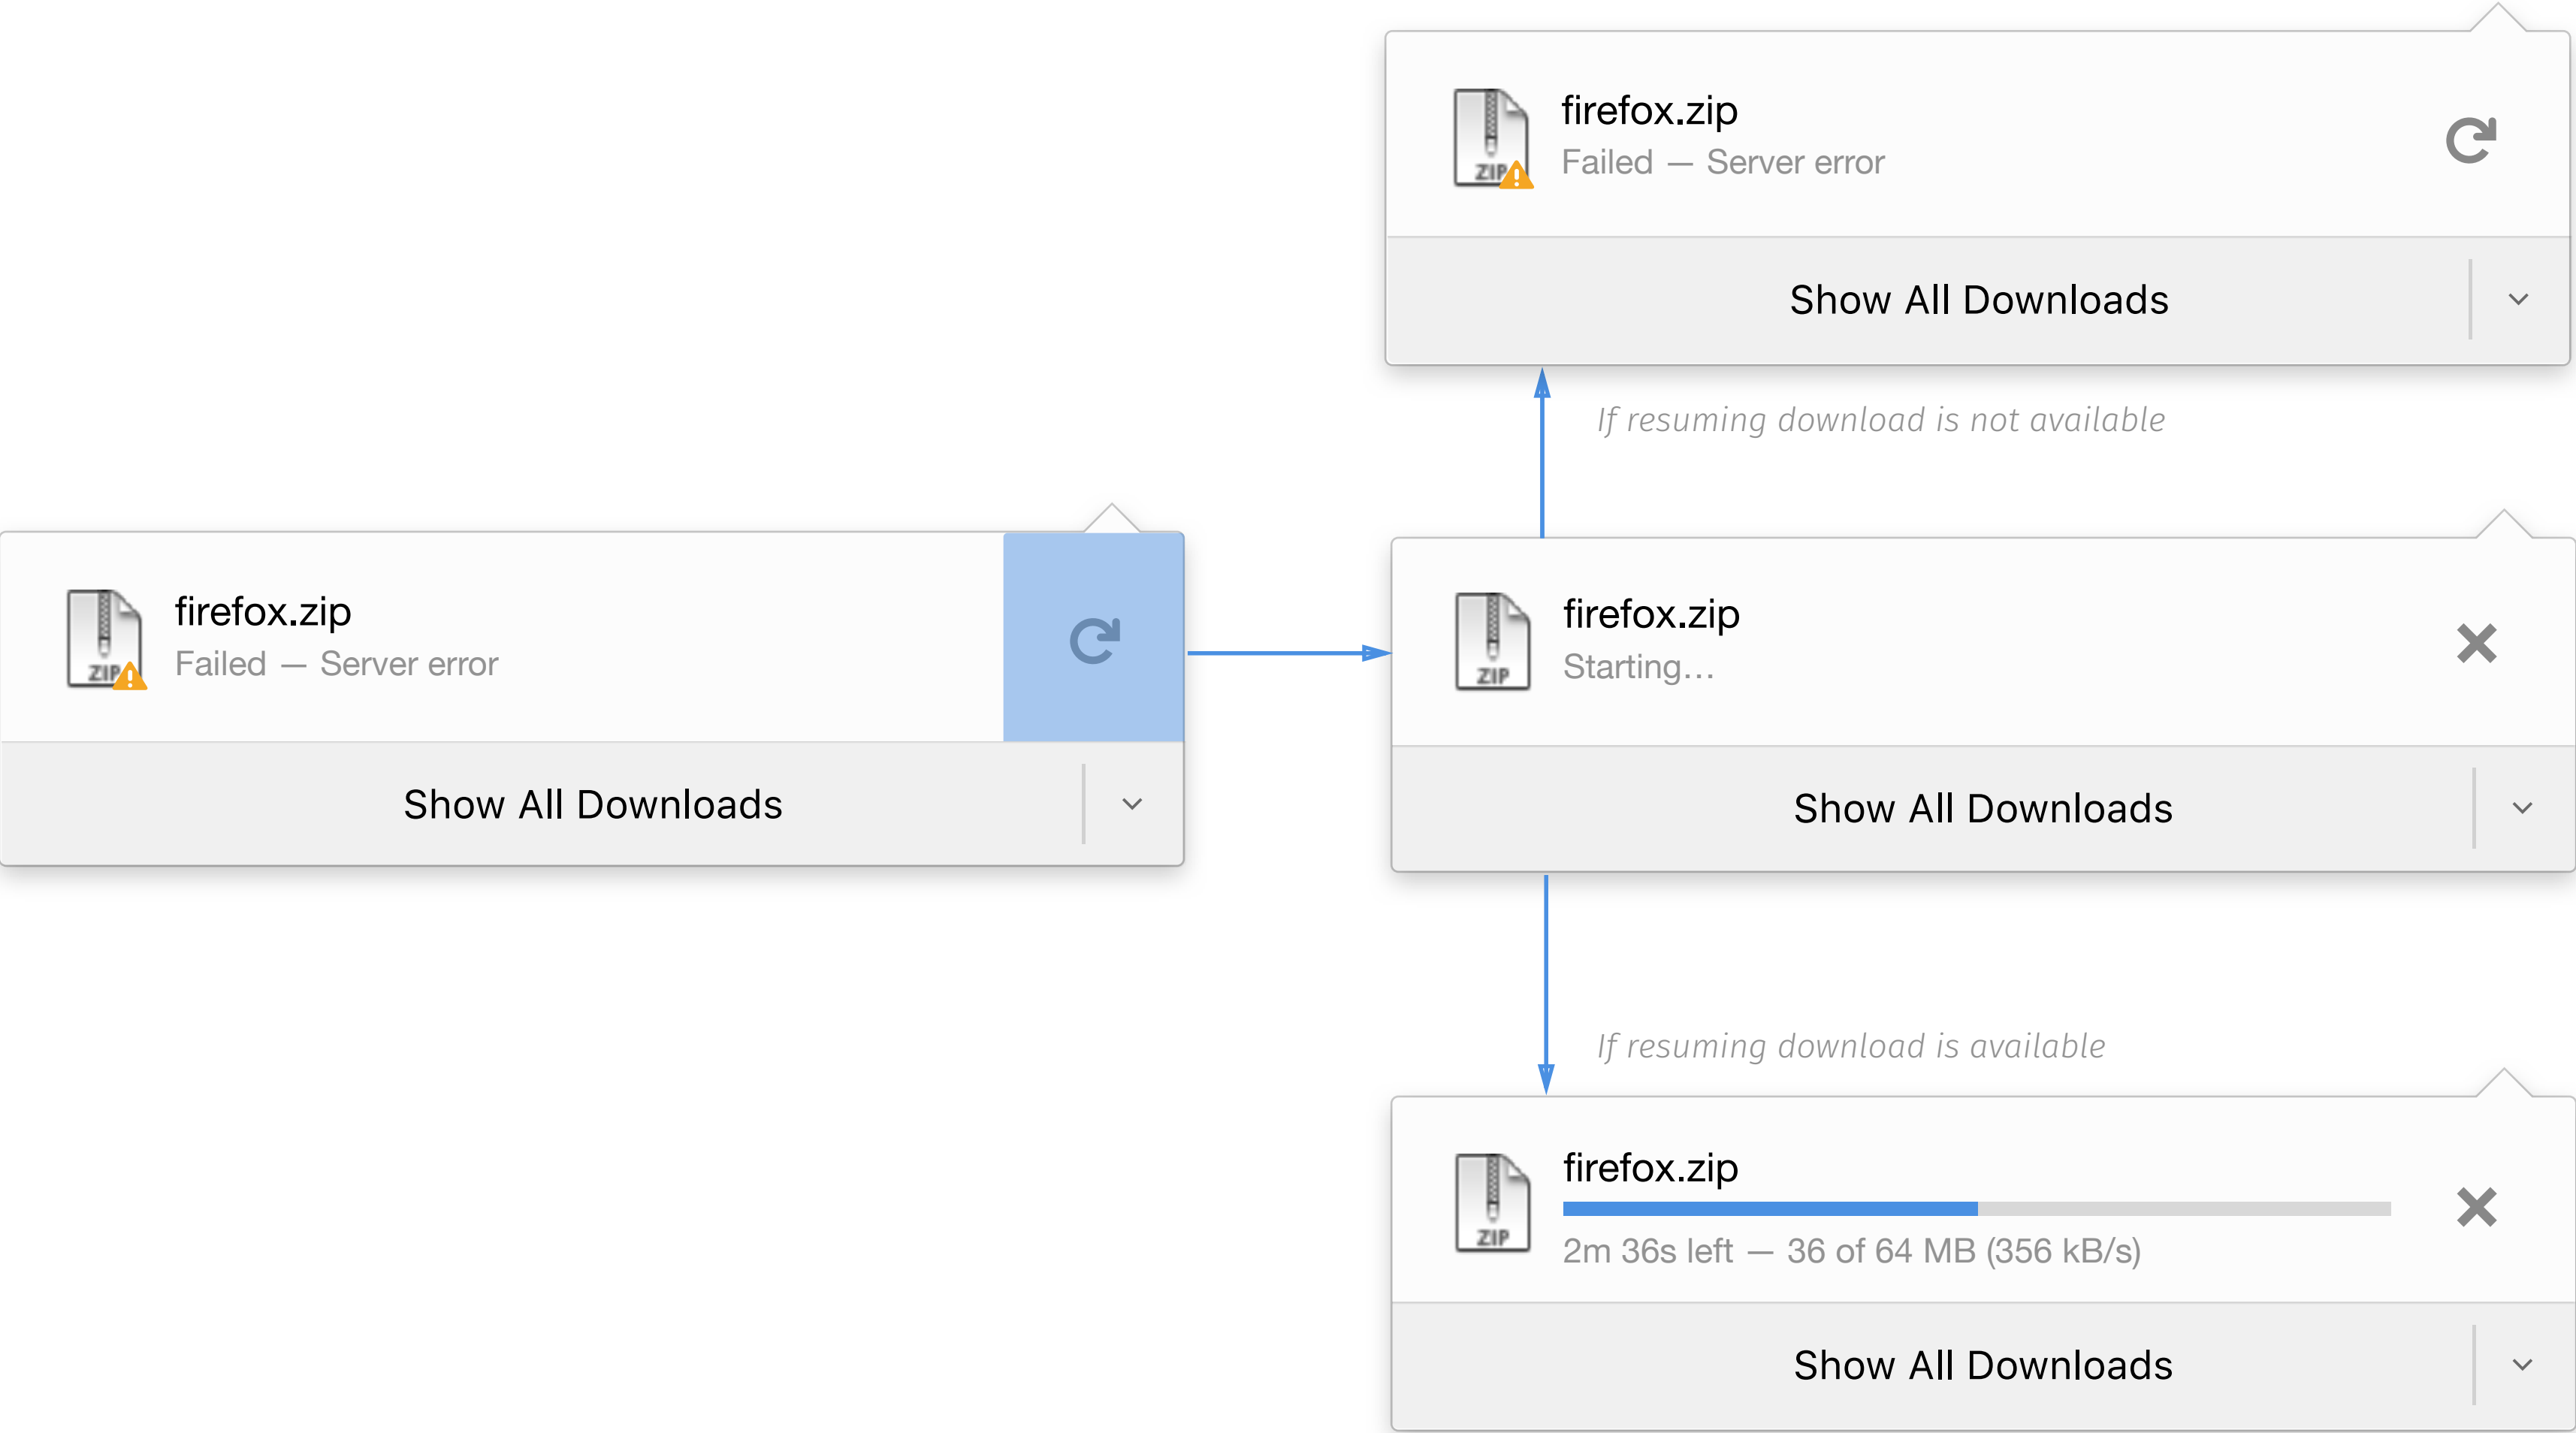

If resuming download is not available

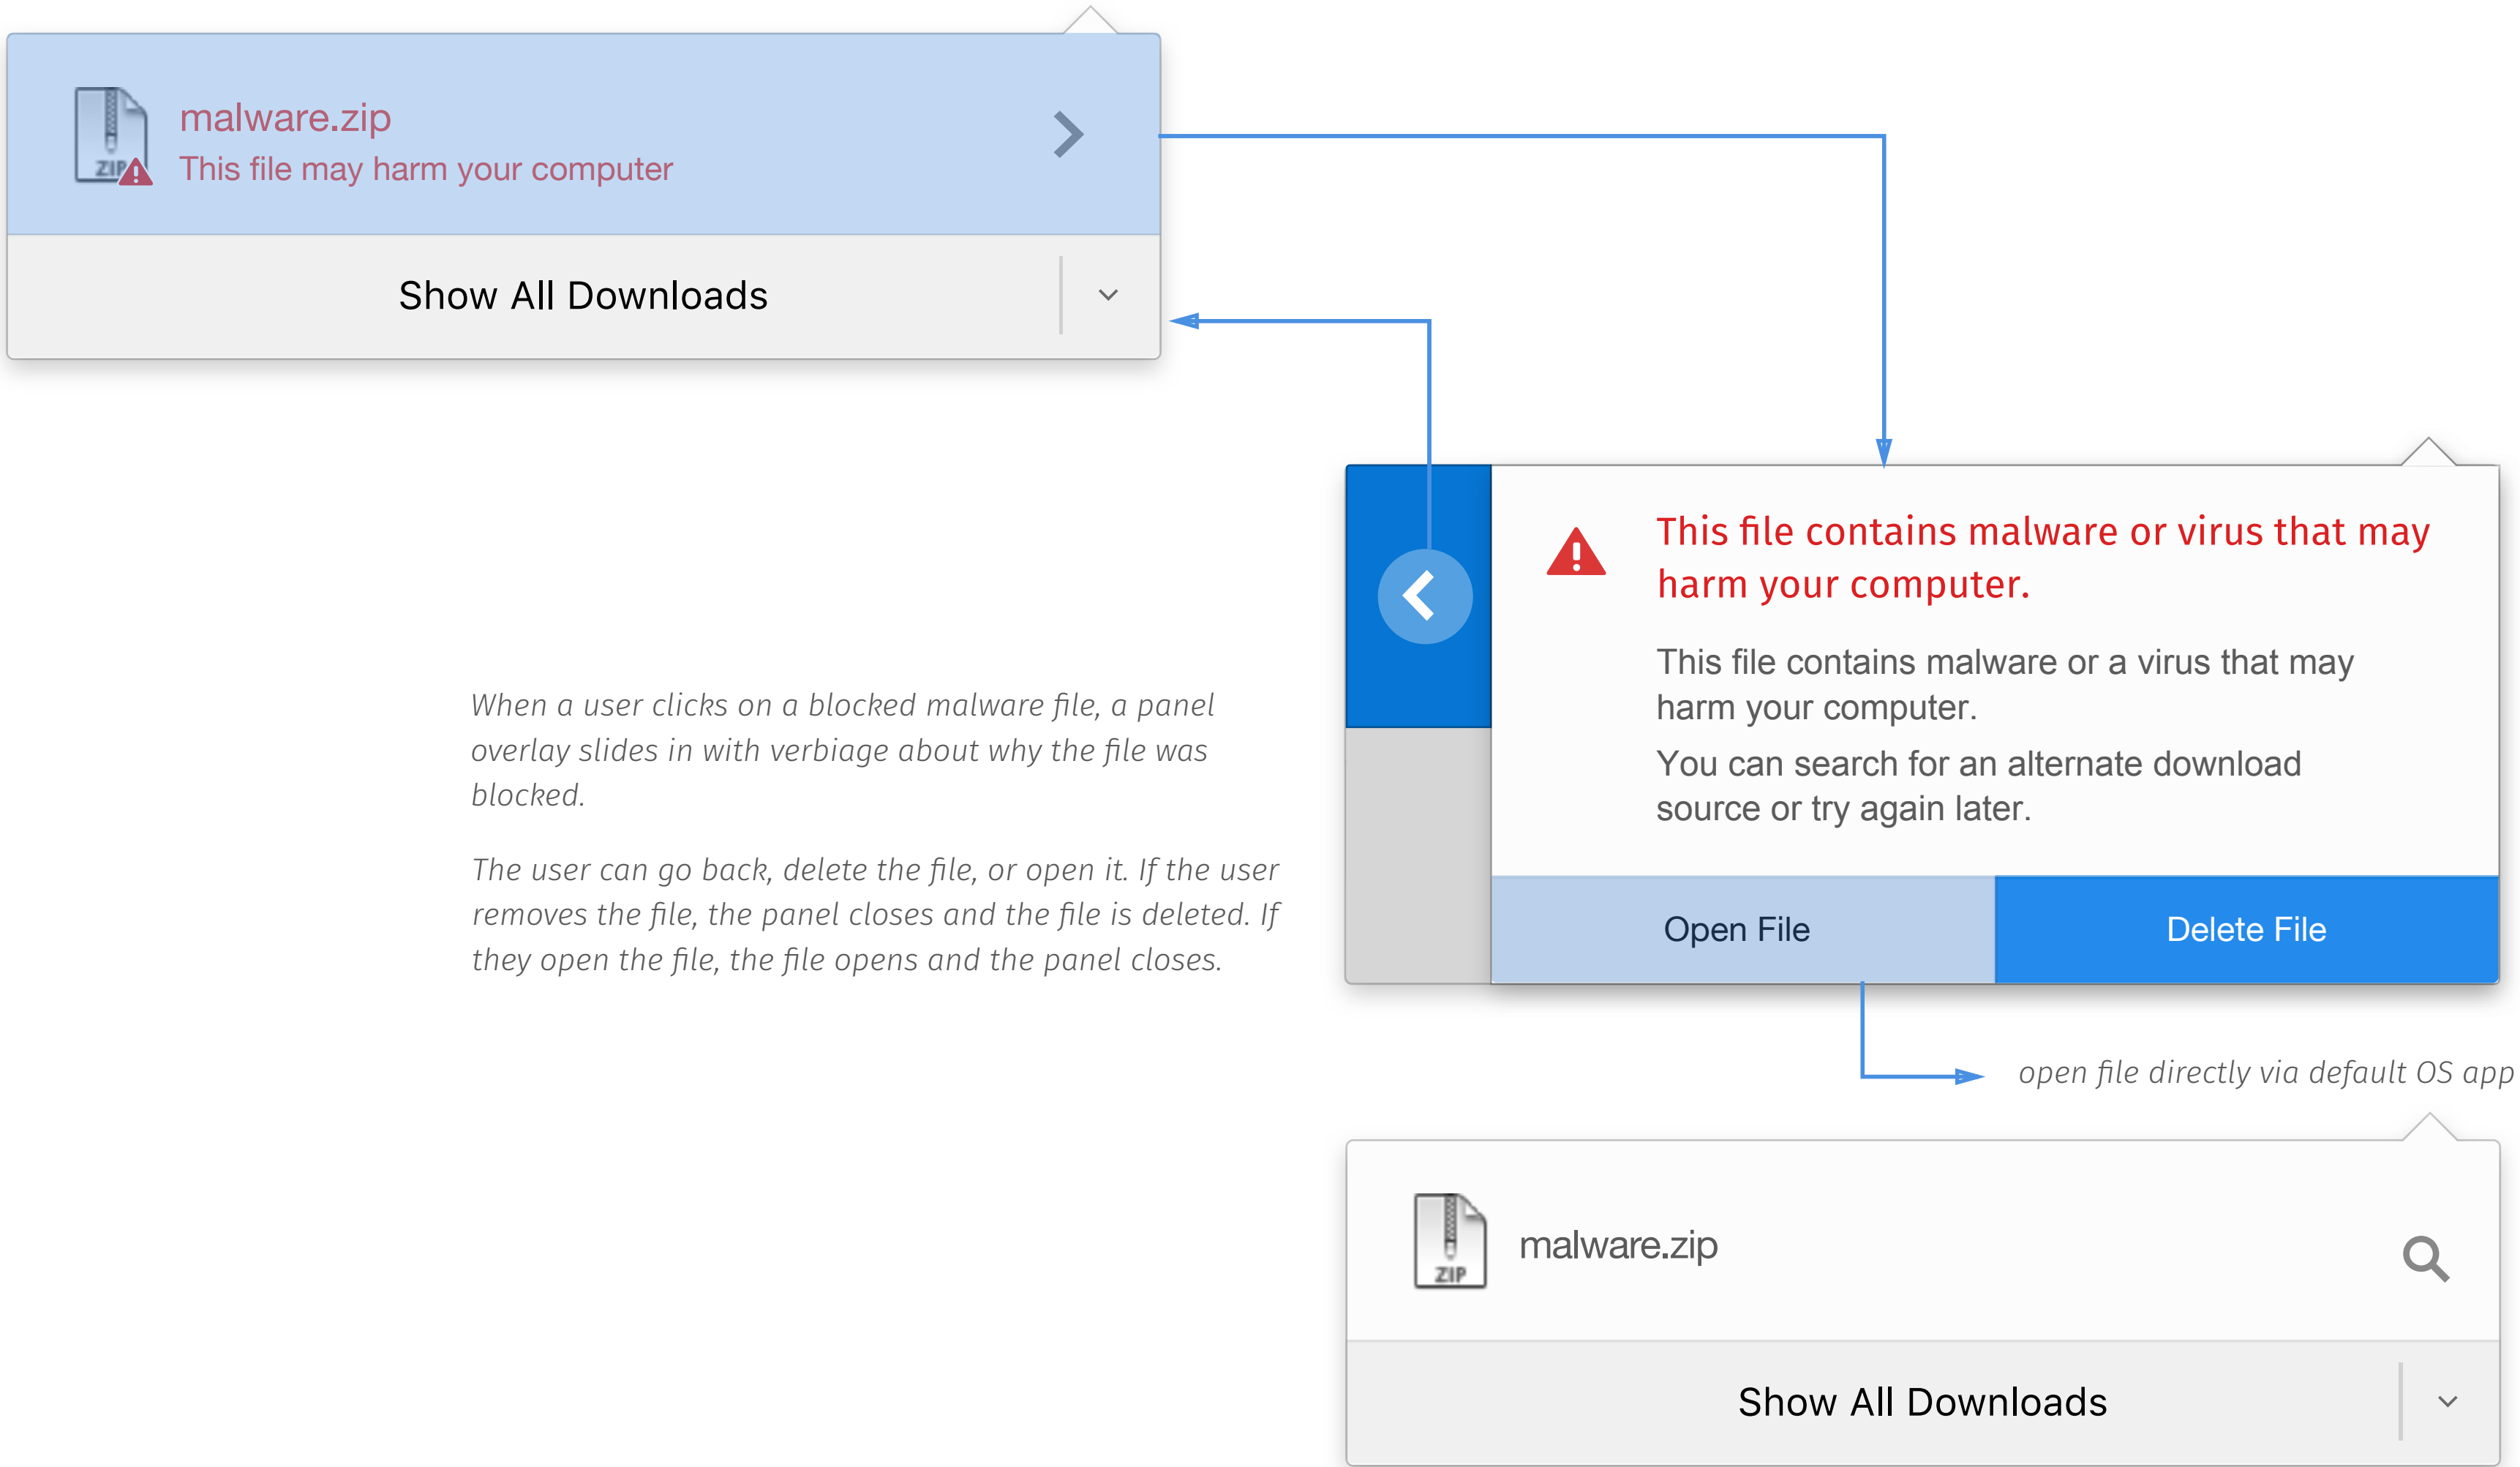

Cancel & Restart

Fail & Restart

Malware

When a user clicks on a blocked malware file, a panel overlay slides in with verbiage about why the file was blocked.

The user can go back, delete the file, or open it. If the user removes the file, the panel closes and the file is deleted. If they open the file, the file opens and the panel closes.

Next time when user opens the panel, the item will now displayed as a normal download.

Uncommon download

The user can go back, delete the file, or open it. If the user removes the file, the panel closes and the file is deleted.

If the user opens the file, the file opens and the panel closes. Next time the user opens the panel, the row is now displayed as a normal download.

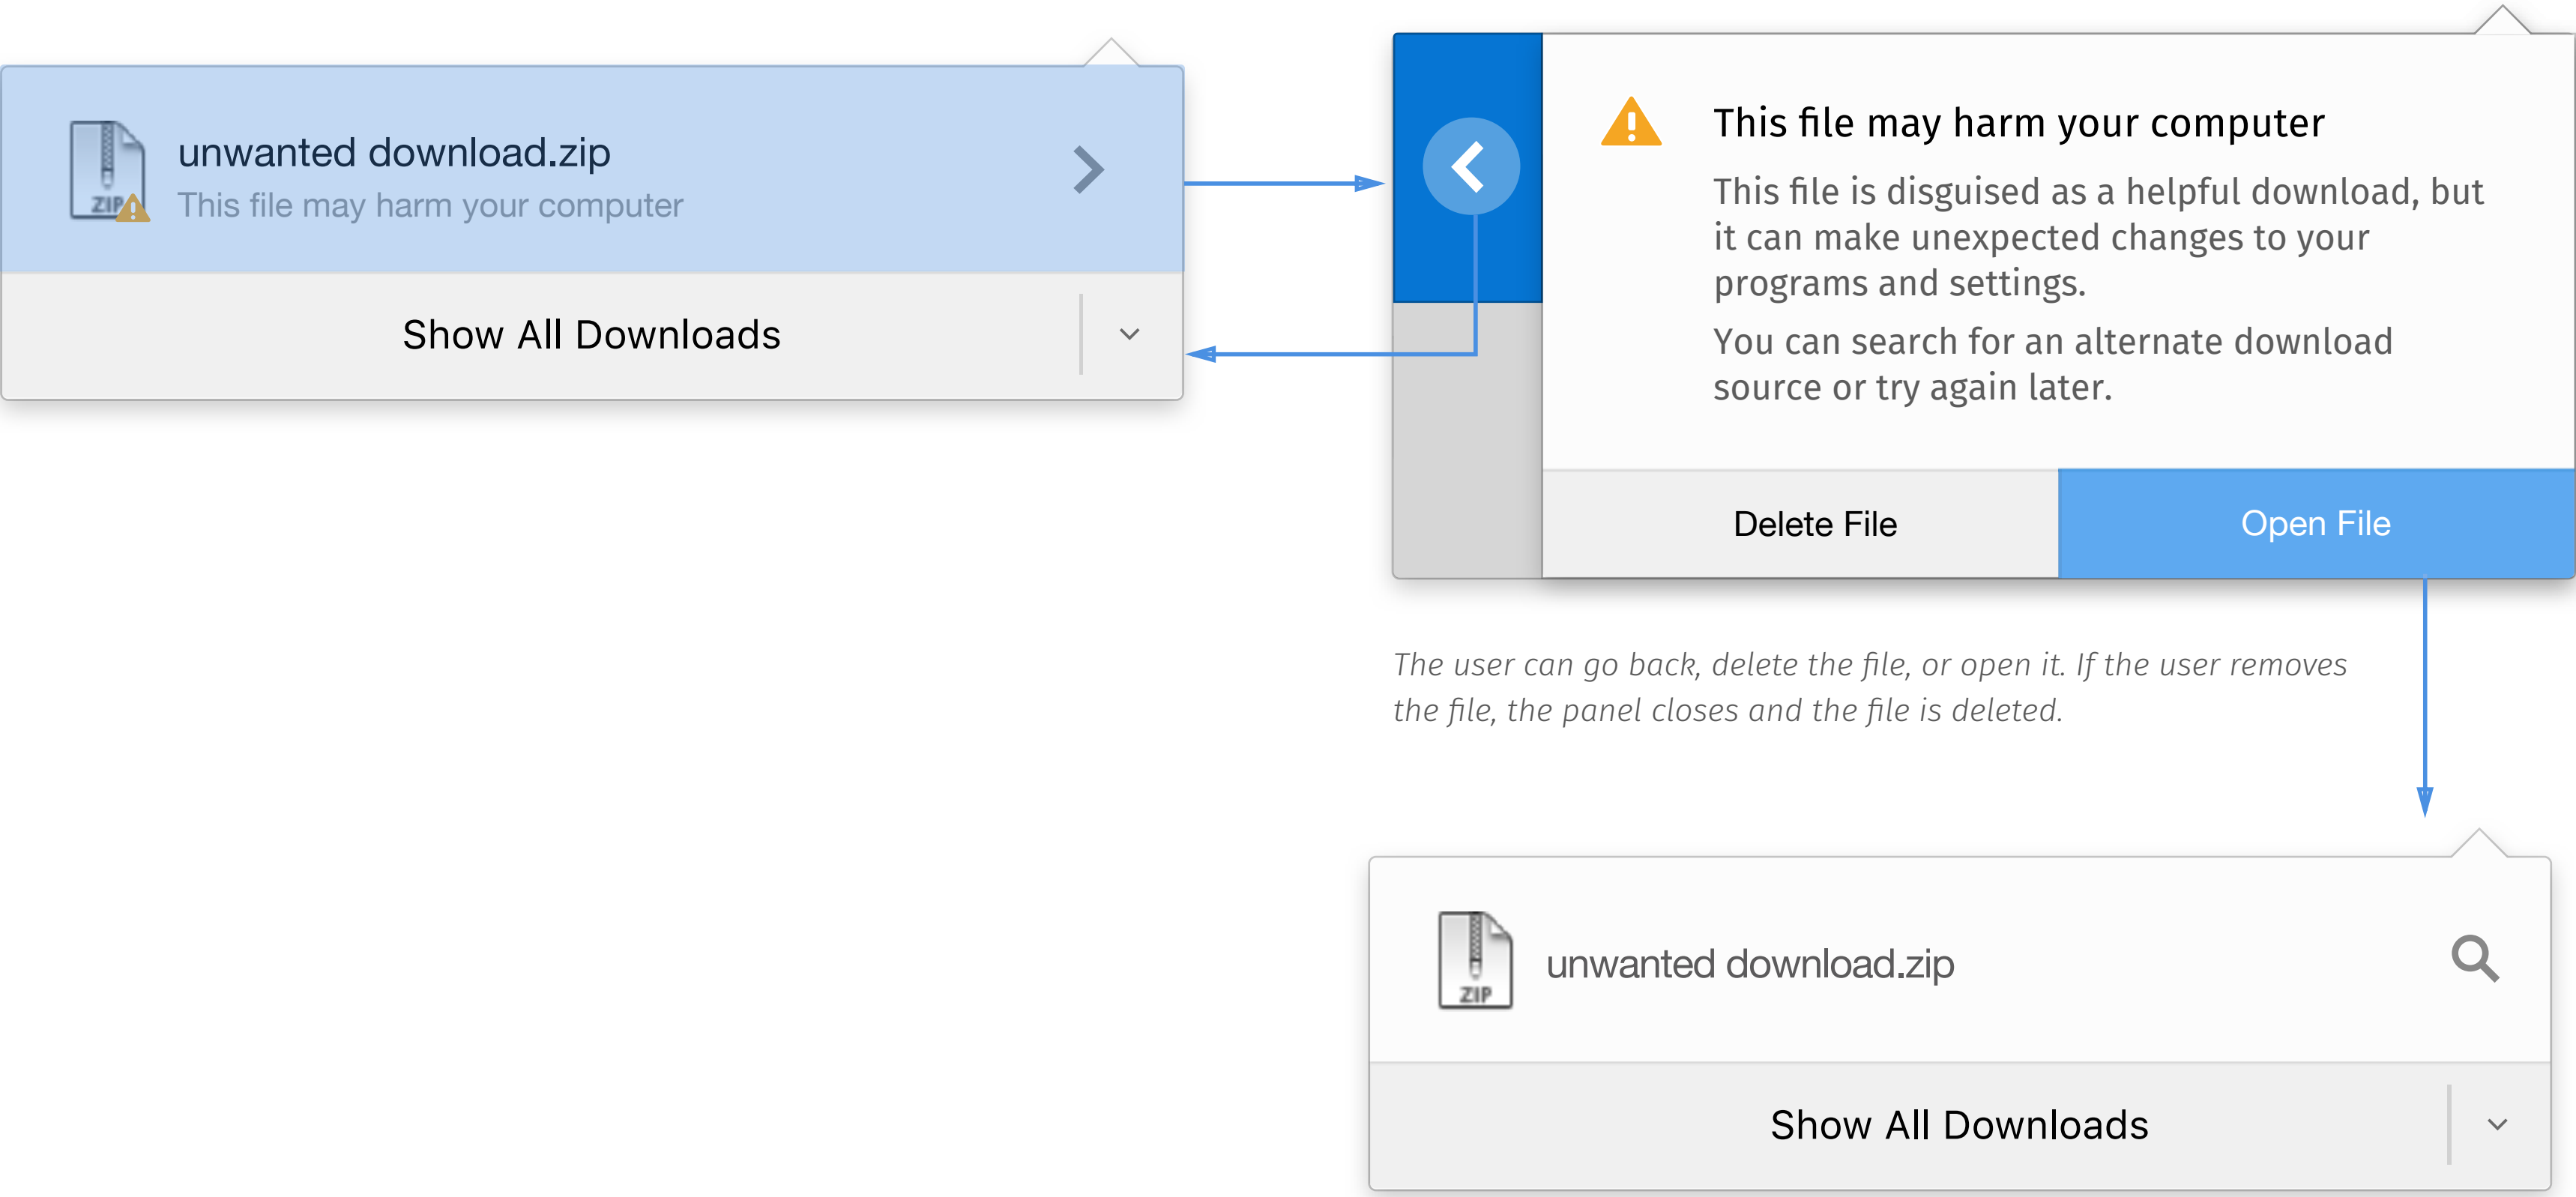

Note

With Malware downloads, the extension is never appended until the user confirms they want to open the file.

With Uncommon Files, we could keep the file accessible through Explorer/ Finder, but the confirmation still exists when I user tries to open the file in Firefox.

Unwatnted download

The user can go back, delete the file, or open it. If the user removes the file, the panel closes and the file is deleted.

If the user opens the file, the file opens and the panel closes. Next time the user opens the panel, the row is now displayed as a normal download.

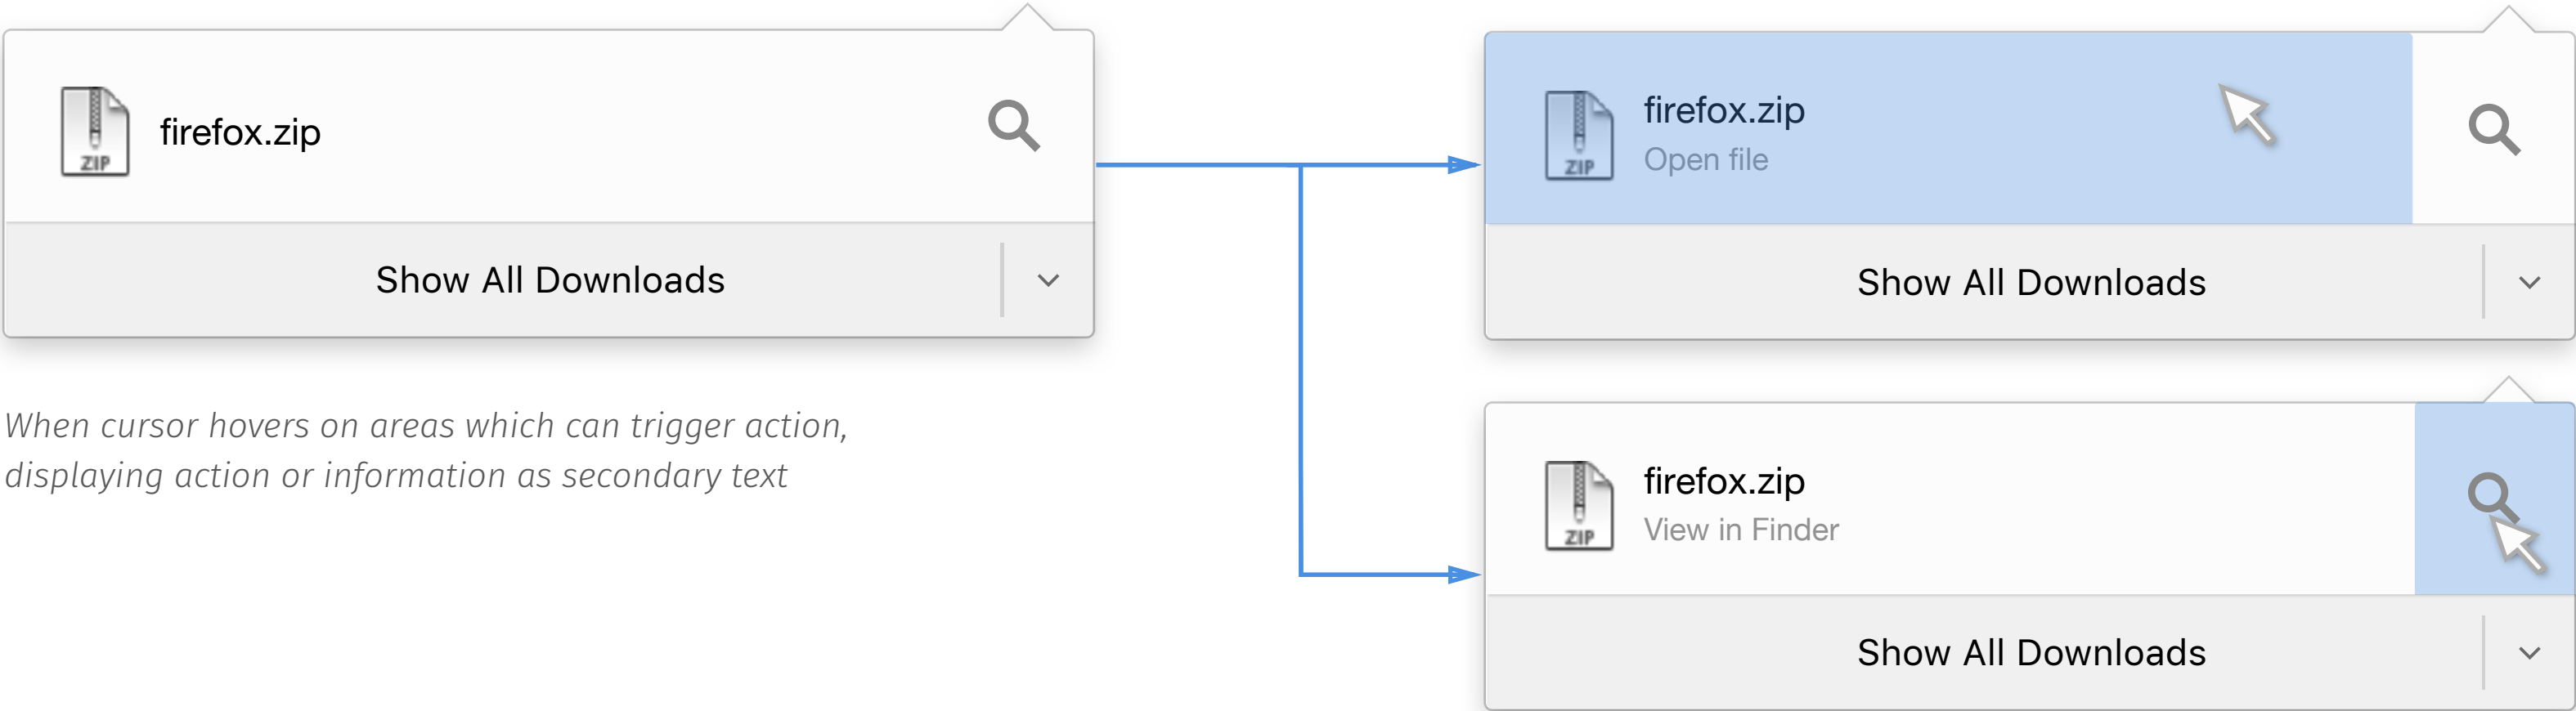

Modal pop-up in the Downloads Library

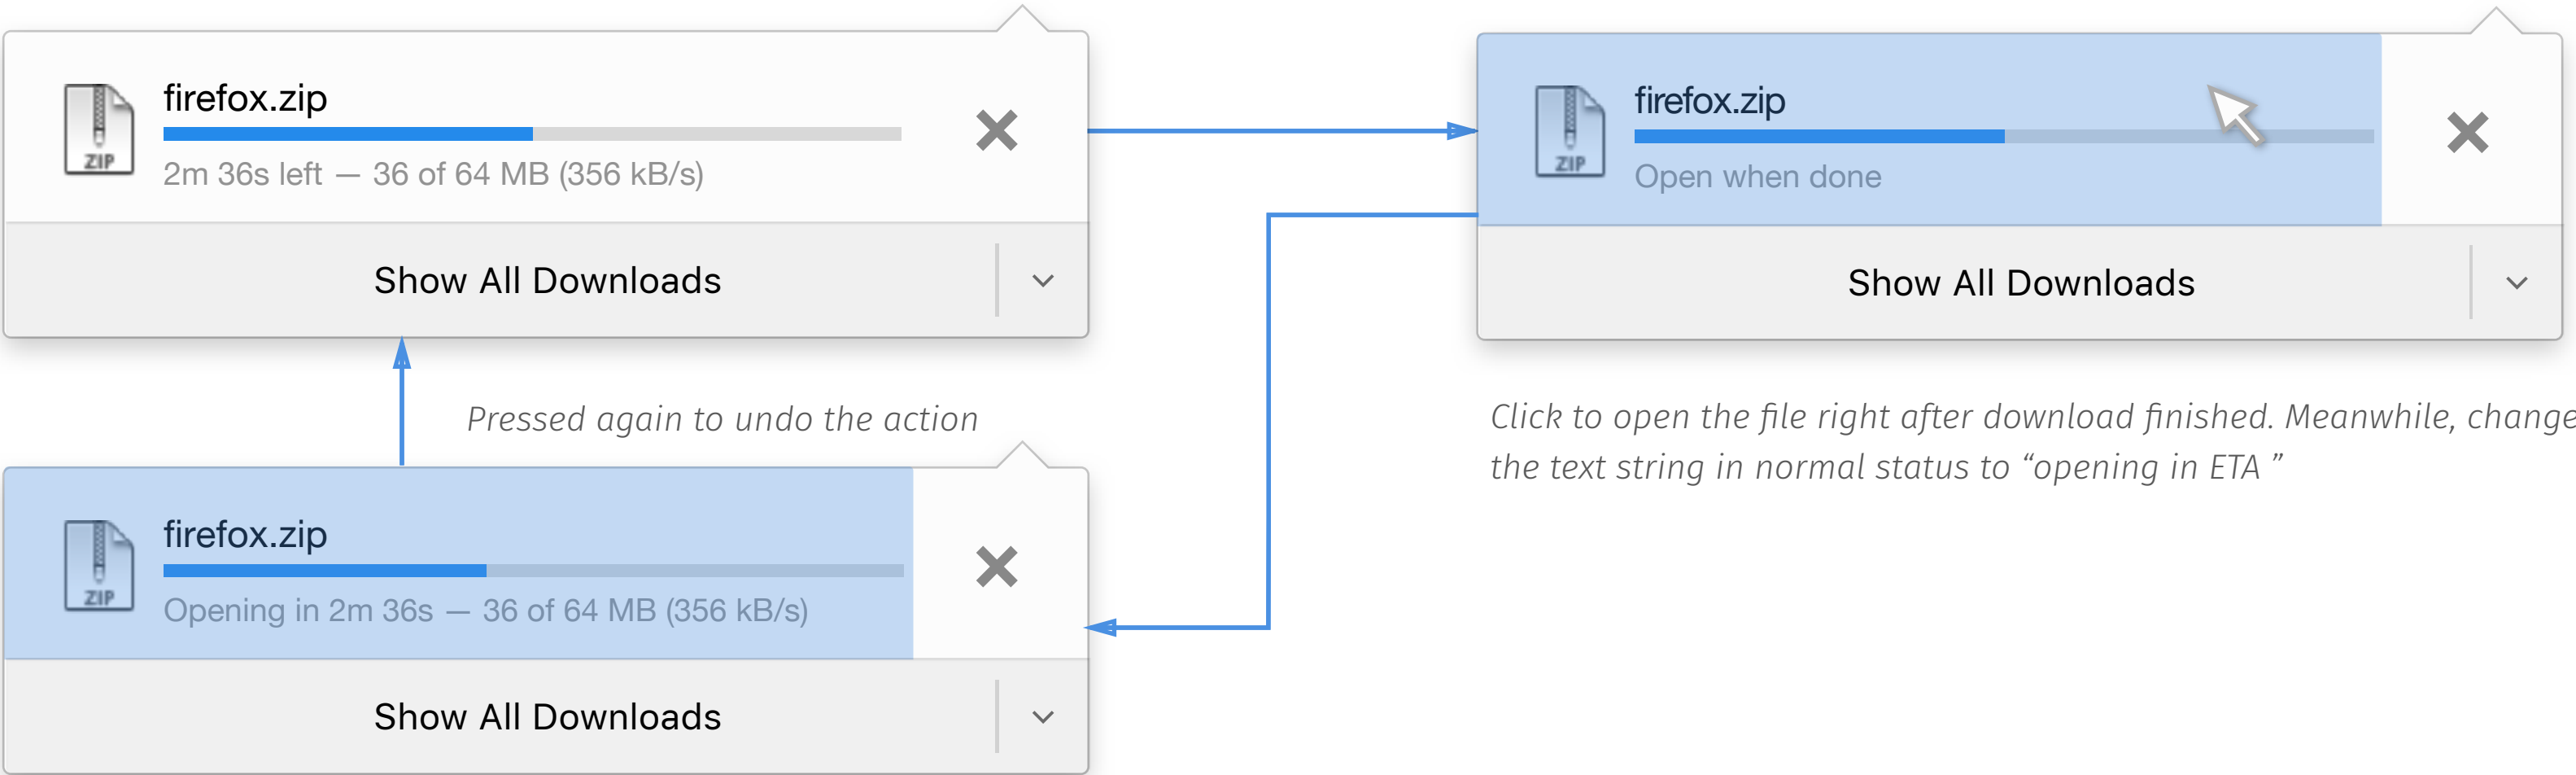

A modal pop-up is used in the Downloads Library instead of a slide-over.
