CA Hierarchy Information

CA Hierarchy	NEED: A description of the PKI hierarchy rooted at or otherwise associated with this root CA certificate. - List and/or describe all of the subordinate CAs that are signed by this root. - Identify which of the subordinate CAs are internally-operated; e.g. list the subordinate CAs that operated by the CA organization associated with the root CA. For example, this might include subordinate CAs created to issue different classes or types of end entity certificates to the general public: Class 1 vs. class 2 certificates, qualified vs. non-qualified certificates, EV certificates vs. non-EV certificates, SSL certificates vs. email certificates, and so on. - It might also include subordinate CAs operated for the benefit of specific third parties. In this case note that we do not require that the CA submit a complete customer list; rather we are interested in the general type and nature of the third-party arrangements	Verified?	Need Response From CA
Externally Operated SubCAs	NEED: - If this root has any subordinate CA certificates that are operated by external third parties, then provide the information listed in the Subordinate CA Checklist, https://wiki.mozilla.org/CA:SubordinateCA_checklist - If the CA functions as a super CA such their CA policies and auditing don't apply to the subordinate CAs, then those CAs must apply for inclusion themselves as separate trust anchors.	Verified?	Need Response From CA
Cross Signing	NEED: - List all other root certificates for which this root certificate has issued cross-signing certificates. - List all other root certificates that have issued cross-signing certificates for this root certificate. - If any such cross-signing relationships exist, it is important to note whether the cross-signing CAs' certificates are already included in the Mozilla root store or not.	Verified?	Need Response From CA
Technical Constraint on 3rd party Issuer	NEED: CP/CPS documentation describing the technical and contractual controls over any 3rd party who may issue certs in this CA Hierarchy. This includes external RAs as well as External subCAs. References: - section 7.1.5 of version 1.3 of the CA/Browser Forum's Baseline Requirements	Verified?	Need Response From CA
