

## Bug report screenshots re “Bcc” facility not working as it should.

Message in Sent folder with “To” against all addressees rather than “Bcc” which appeared in address box. This was Bcc of a List plus a Bcc entry to myself.

To All Members,

Just a quick note to remind you that today is copy date for next Monday's Bulletin. I am away Friday and Saturday this time so cannot be quite as flexible as sometimes (I'll not be able to do it all on Sunday!).

I look forward to any contributions you might have.

Cheers,

Rex

I then composed an apology for the open addressing to all members. Note “Rot Club” list in Bcc as well as my name.

Write: [Apology for open addressing on] North Wirral Club's July Bulletin - Reminder: Copy Date Today

From: Rex Andrew <rex.andrew@live.co.uk> rex.andrew@live.co.uk

Bcc: Rex Andrew <rex.andrew@live.co.uk>

Bcc: Rot Club <Rot Club>

Subject: [Apology for open addressing on] North Wirral Club's July Bulletin - Reminder: Copy Date Today

Paragraph Arial

All,

Apologies again for your addresses having appeared as “To” rather than “Bcc” in the message below. They were definitely in the Bcc box when I composed the message - and I'm taking screenshots this time to support a bug report to the providers of my mail application - and this message will probably also convert my “Bcc” entry to all Club Members to “To” - so sorry if you get another with open addresses. I am trying to get it sorted out as the only other solution I can think of is pretty tiresome.

Kind regards,

Rex

Message sent and appeared to go normally.

This message was received with “To” addressing – and the Sent message copy has also lost the Bcc entries – this is from the Sent message:

From: Rex Andrew  
Subject: [Apology for open addressing on] North Wirral Club's July Bulletin - Reminder: Copy Date Today  
To: Rex Andrew, L, nt, Br, rey, Mi, ris, Mich, dy, M, ner, Le, im, Nic, ey, bri, es, Jan, vin, Graf, dden, Pe, cer, 34 more
