

REPORT OF INDEPENDENT CERTIFIED PUBLIC ACCOUNTANTS

To the Management of IdenTrust, Inc.:

We have examined the [assertion by the management](#) of IdenTrust, Inc. (“IdenTrust”) that in providing its SSL Certification Authority (CA) services at its primary and secondary locations during the period from July 1, 2013, to June 30, 2014, management of IdenTrust has:

- Disclosed its Certificate practices and commitment to provide ACES and TrustID SSL Certificates in conformity with the applicable CA/Browser Forum Guidelines
- Maintained effective controls to provide reasonable assurance that:
 - The Certificate Policy and/or Certificate Practice Statement are available on a 24x7 basis and updated annually;
 - Subscriber information was properly collected, authenticated (for the registration activities performed by the CA, Registration Authority (RA) and subcontractor) and verified;
 - Logical and physical access to CA systems and data was restricted to authorized individuals;
 - The continuity of key and certification management operations is maintained; and
 - CA systems development, maintenance, and operations are properly authorized and performed to maintain CA systems integrity

For the CA services known as TrustID and Access Certificates for Electronic Services (ACES), based on the [AICPA/CICA Trust Services Principles and Criteria for Certification Authorities SSL Baseline Requirements Version 1.1](#).

IdenTrust’s management is responsible for its assertion. Our responsibility is to express an opinion on management’s assertion based on our examination.

IdenTrust makes use of external registration authorities for specific subscriber registration activities as disclosed in IdenTrust’s business practice disclosures. Our examination did not extend to the controls exercised by the external registration authorities.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants, and accordingly, included (1) obtaining an understanding of IdenTrust’s key and SSL certificate life cycle management business practices and its controls over key and SSL certificate integrity, over the authenticity and privacy of subscriber and relying party information, over the continuity of key and certificate life cycle management operations, and over development, maintenance and operation of systems integrity; (2) selectively testing transactions executed in accordance with disclosed key and certificate life cycle management business and information privacy practices; (3) testing and evaluating the operating effectiveness of the controls; and (4) performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

In our opinion, for the period July 1, 2013, to June 30, 2014, IdenTrust’s management’s assertion, as set forth in the first paragraph, is fairly stated, in all material respects, based on the [AICPA/CICA Trust Services Principles and Criteria for Certification Authorities SSL Baseline Requirements Version 1.1](#).

Because of inherent limitations in controls, errors or fraud may occur and not be detected. Furthermore, the projection of any conclusions, based on our findings, to future periods is subject to the risk that (1) changes made to the system or controls, (2) changes in processing requirements, (3) changes required

because of the passage of time, or (4) degree of compliance with the policies or procedures may alter the validity of such conclusions.

The WebTrust seal of assurance for Certification Authorities on IdenTrust's Website constitutes a symbolic representation of the contents of this report and it is not intended, nor should it be construed, to update this report or provide any additional assurance.

The relative effectiveness and significance of specific controls at IdenTrust and their effect on assessments of control risk for subscribers and relying parties are dependent on their interaction with the controls, and other factors present at external registration authorities, individual subscriber and relying party locations. We have performed no procedures to evaluate the effectiveness of controls at external registration authorities, individual subscriber and relying party locations.

This report does not include any representation as to the quality of IdenTrust's services beyond those covered by the [AICPA/CICA Trust Services Principles and Criteria for Certification Authorities SSL Baseline Requirements Version 1.1](#), nor the suitability of any of IdenTrust's services for any customer's intended purpose.

**ASSERTION OF MANAGEMENT AS TO ITS DISCLOSURE OF ITS PRACTICES AND ITS
CONTROLS OVER ITS SSL CERTIFICATION AUTHORITY OPERATIONS
DURING THE PERIOD FROM JULY 1, 2013, TO JUNE 30, 2014**

September 19, 2014

Management has assessed the controls over its SSL CA operations. Based on that assessment, in IdenTrust management's opinion, in providing its CA services at its primary and secondary locations, IdenTrust, during the period from July 1, 2013, to June 30, 2014:

- Disclosed its Certificate practices and its commitment to provide ACES and TrustID SSL Certificates in conformity with the CA/Browser Forum Guidelines
- Maintained effective controls to provide reasonable assurance that
 - The Certificate Policy and/or Certificate Practice Statement are available on a 24/x7 basis and updated annually;
 - Subscriber information is properly collected, authenticated (for the registration activities performed by the CA, Registration Authority (RA) and subcontractor) and verified;
 - The integrity of keys and certificates its manages was established and protected through their lifecycles;
 - Logical and physical access to CA systems and data is restricted to authorized individuals;
 - The continuity of key and certificate life cycle management operations is maintained; and
 - CA systems development, maintenance and operations are properly authorized and performed to maintain CA systems integrity.
