

- FIREFOX DESKTOP IS NOT GOOD — IF IT FALLS BELOW 10%, HARD TO RECOVER
- MOBILE MARKETSHARE: NEVER BEEN MEANINGFUL
- TAKE MORE RISKS THAN WE ARE USED TO

• LION CONFIGURATION FILES 24/4/2017

- FILES SUPPORTED BY A SUBSET OF LOCALES
- MOVE LOGIC TO TESTS

• PATH

: Reference

: Lion

: Test : array

• Deadline : ~~date~~ date + MILESTONES

• Priority : numeric } support subsets

• Flags : array

• Conflicting ~~paths~~ paths? → order them?

• get first match bottom to top

• browser/*

• browser/extensions

TIERS:

- include tiers defined inside the configuration file, not mozilla-central

METADATA:

- DEADLINE
- PRIORITY
- FLAGS (opt-in)

} X FILE AND LOCALE

~~FILTERS~~ → META
~~ACTION~~ → METADATA

NOPE: FILTERS ARE NOT GOING TO GROW BEYOND IGNORE, ERROR, WARNING. META COULD

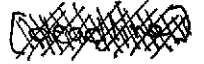

[[metadata]]

- path
- locales (opt.)
- deadline
- priority
- flags

→ more like filters

} any of these can be defined

(FIREFOX)

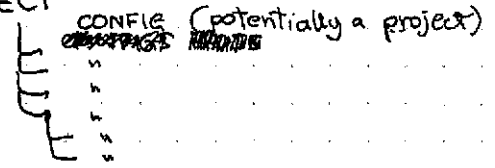

[[metadata]]

- path =
- deadline =
- priority =
- flags =

=> needs aggregation

GLOBAL → anything!!

↳ PROJECT

[[project]]

"GLOBAL CONFIGURATION"

name = "Firefox"

 path =

- Should we provide a canonical way to access this data?
- DEADLINES VS MILESTONES
- MULTIPLE MILESTONES

deadline = 2017-04-25

deadlines ≠ milestones =

- [2017-04-25 : "translation comp"
- 2017-04-31 : "assets ready for review"

milestones = [

2017-06-12 : "Merge day"

PONTON

For DEADLINES send NOTIFICATIONS?
 For MILESTONES show it in the UI?
