JS

JSConf.Asia 2018

Due to increased demand now with more everything!

How can we trim an event even better towards the goal of inspiring people about the open web, help them step up their commitment to community and open source and better the products, tools and technologies we all end up using on the web platform?

The answer is this upcoming 3 day long JSConf.Asia 2018. In between our two talk and keynote focussed days at the Capitol Theatre, we're hosting a pure workshop and community day at the Shangri-La Resort Hotel on Sentosa to really give our attendees time and access to the hardware, software and the people that build the web.

This gives you as a sponsor of JSConf.Asia even more opportunity to engage and educate our audience of web developers and engineers in inspiring and creative ways that make your brand stand out as great product, caring employer or simply as honest web community supporter.

I'm looking forward to working with you this year.

@RamanShalupau

How to solve tech talent shortage in Singapore: close the border, ensure no speaker or attendee of [#jsconfasia](#) leaves the country 😊 Done.
