Manual QA'S ASSESSMENT & RECOMMENDATION

Feature status: GREEN

- Reason: No critical issue and most bugs are currently on focus.

Recommendation: SHIP IT

- Reason:
- [Bug 1348223](#) leads to discussion for better site data and permission. Open issues we have are more and less related to this bug and worth of checking backlog ahead.
- For recommendation, I would like to see those bugs are put into backlog so that we can handle them in the close future
