

PHP code produces nice dropdown

```
// populate categorie dropdown
foreach ($_SESSION['dropdown_sf'] as $data) {
    echo '<option value="'. $data["catID"].'" style="padding-top: 40px; font-size: 18px; font-weight: bold; height: 90px;
    background-image:url('.$http.$imgDir.$data["cat_image"].'); background-size: 90px 80px; background-repeat: no-repeat;
    background-position: right center;">'. $data["cat_name"].'</option>';
}
}
```

Inspector

The screenshot shows the browser's developer tools with the following details:

- HTML Structure:** A form with a select element named "famille". The selected option is:

```
<option value="34" style="padding-top: 40px; font-size: 18px; font-weight: bold; height: 90px; background-image: url('http://localhost/smart_entreprise/neocustom/neophp/images/e-commerce/categ_1501402951_original.png'); background-size: 90px 80px; background-repeat: no-repeat; background-position: right center;">Blouson / Veste pour adultes et enfants</option>
```
- Inspector:** The selected option is highlighted in blue. The background image is a product image of "BON BIEU" soups.
- Styles:** The "Rules" panel shows the following styles for the selected option:
 - padding-top: 40px;
 - font-size: 18px;
 - font-weight: bold;
 - height: 90px;
 - background-image: url('http://localhost/smart_entreprise/neocustom/neophp/images/e-commerce/categ_1501402951_original.png');
 - background-size: 90px 80px;
 - background-repeat: no-repeat;
 - background-position: right center;
- Bootstrap CSS:** The "bootstrap.css:1" rule shows:
 - webkit-box-sizing: border-box;
 - moz-box-sizing: border-box;
 - box-sizing: border-box;
- admin.css:2:** The ".input_18" rule shows:
 - font-family: Arial, Helvetica, sans-serif;
 - font-size: 18px;

Upgrade to firefox 57

Same PHP code produces "garbage":

- <option> font-size is set to small for ALL <select> dropdown
- images are not showing anymore

```
// populate categorie dropdown
foreach ($_SESSION['dropdown_sf'] as $data) {
    echo '<option value="' . $data["catID"] . '" style="padding-top: 40px; font-size: 18px; font-weight: bold; height: 90px; background-image:url(' . $http.$imgDir.$data["cat_image"] . '); background-size: 90px 80px; background-repeat: no-repeat; background-position: right center;">' . $data["cat_name"] . '</option>';
}

```

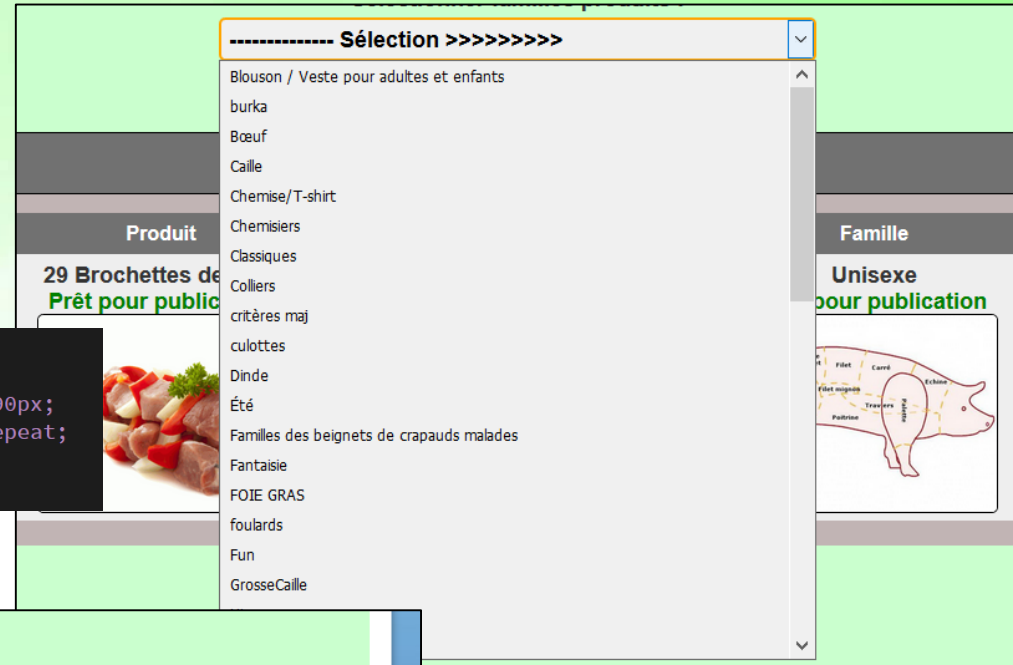

Inspector

The screenshot shows a browser window with a developer tool open. The page content includes a 'Produit' section with '29 Brochettes de Prêt pour public' and a 'Famille' section with 'Unisex pour publication'. The developer tool shows the HTML structure of the dropdown menu, with the following CSS rules applied to the selected option:

```

padding-top: 40px;
font-size: 18px;
font-weight: bold;
height: 90px;
background-image: url(http://localhost/smart_entreprise/neocustom/neophp/images/e-commerce/categ_1581402951_original.png);
background-size: 90px 80px;
background-repeat: no-repeat;
background-position: right center;

```

<option> font size not working for all <select> after upgrade to firefox 57

HTML mark-up

```
<select name="tri" id="changTri" class="radius10" style="font-size: 18px; height: 35px; width: 220px;">
  <option selected disabled hidden value="">
    <?php echo $trilab; ?>
  </option>
  <option value="produita">Produit &nearr;</option>
  <option value="produitd">Produit &searr;</option>
  <option value="statuta">Statut &nearr;</option>
  <option value="statutd">Statut &searr;</option>
  <option value="famillea">Famille &nearr;</option>
  <option value="familled">Famille &searr;</option>
  <option value="datec">Date &nearr;</option>
  <option value="dated">Date &searr;</option>
  <option value="user">Utilisateur</option>
</select>
```

before firefox 57

after firefox 57
