1. Making a list
2. Checking it twice
3. Note that the list box says we're in Body Text mode
4. About to end this list with <return><return>

Note the list box has changed the composition window to Paragraph mode. (The checkbox in Preferences is unchecked.) About to hit <return>

Damn paragraph blank line above. Also, there are times I let lines wrap and other times when I'm a control freak and hit <shift><return> like now

Reverting to default <p> mode is a pain-in-the-butt.
