Thank You!

Thank you for signing up for Firefox Quantum for Enterprise.

Get Started

[Here is where you'll find documentation and support](#) regarding how to configure and deploy Firefox Quantum in your organization. You may choose to deploy the standard Firefox Rapid Release (RR), which receives performance and feature improvements every six weeks, or the Extended Support Release (ESR), which receives one major update per year. Both Firefox RR and ESR receive critical security fixes as soon as possible.

Give us your feedback

We would love to hear from you regarding any issues you might encounter in your testing, or if you have feature requests. We encourage you to [complete this survey here](#). If you would like to discuss issues configuring and deploying Firefox with Mozilla staff and other IT professionals, please join the discussion on the [Mozilla enterprise mailing list](#).
