CA Hierarchy Information

CA Hierarchy	Section 1.3.1 of the CPS says:	Verified?	Verified
---------------------	--------------------------------	------------------	----------

"This CPS covers all Certificates issued and signed by the following CAs."

And it lists the Entrust root certificates (including this root) and their subCAs. The subCAs for the other Entrust roots are disclosed in the CCADB.

There is currently only one subordinate CA (Entrust Certification Authority - L1N) which has been set up for testing, and configured for EV SSL certificates. There will be more subordinate CAs once the root has been embedded.

**Externally
Operated SubCAs**

For this root Entrust only plans to have subordinate CAs that will be operated by Entrust.

Need Response From CA

NEED: Update CPS section 7.1.6.3 to require third party subordinate CAs to comply with this CPS and with the BRs if ECU in the subCA cert enables SSL cert issuance.
CPS section 7.1.6.3 says:
"Subordinate CA Certificates issued to a Third Party Subordinate CA must include one or more explicit certificate policy object identifiers that indicates the Third Party Subordinate CA's adherence to and compliance with the requirements documented in its CP and/or CPS. These requirements may include adherence and compliance to the Baseline Requirements."

Cross Signing

Currently no cross-signing with this root.
CPS section 1.3.1 lists the externally issued cross certificates that are signed by other Entrust roots, and binds them to this CPS.

**Technical
Constraint on 3rd
party Issuer**

External RAs are allowed.
CPS section 3.2.2.4: "The CA shall confirm that prior to issuance, the CA or the RA validated each Fully-Qualified Domain Name (FQDN) listed in the SSL or EV SSL Certificate using at least one of the methods listed below."
