1. Lowest content at first 2 A few millimetres after X screenful is the top of the red leaves the top of the screen picture. Call it X there is always one "short frame" of animation A https://www.mozilla.org/en-GB A https://v https://v A https://v A https://v A https://www.mozilla.org/en-GB m Pod Pod The new Firefox IRL season 3: The grand IRL sea bargain Fast for good. Pod Pod IRL sea IRL sea bargai You click "accept" every day, but IRL sea 2x the speed. Built-in privacy protection. bargai bargai You click often don't know what you're IRL sea Powered by Mozilla. bargai You click You click often do giving away. Is it a fair trade, or There's a better way to browse. IRL sea bargai You click often do often do giving av should you demand a better bargai You click often do giving av giving av should y bargain? You click often do **Firefox for Android** giving av should y should y bargain? often do giving av should y bargain? bargain? should y giving av bargain: should v bargain? bargain?

These are screen grabs of consecutive animation frames of a fling from the top of the page.

DI DU Recorder

I see the same problem on Fennec and on Focus + Geckoview, for pretty much any page
