

Senior Experiments Software Engineer

Apply for this job

TEAM: Engineering

LOCATIONS: Mountain View, Remote, San Francisco, Toronto

The target locations for this role are our Mountain View, San Francisco, and Toronto Offices.

“Ideas should be risky; code should be safe.”

Mozilla is looking for a Senior Experiments Software Engineer to further the expanding in-product experiments program. We are seeking a diligent app or web engineer who is looking to grow their experience in experimental design, execution, and interpretation within a multidisciplinary team. Please apply to help Mozilla explore the dynamics of the Web and work to improve Firefox.

About the Job

The Firefox Strategy and Insights team performs behavioral and attitudinal research to help Mozilla make better decisions for our users. We also own Shield, the Firefox in-product experiments program. The core responsibility of this engineer is to improve tooling and processes to increase the power of experimentation, by reducing shipping and operational risk.

You will actively participate in development and deployment of experiments via the Firefox Shield infrastructure and subsequent analysis, interpretation, and communication of results. In addition, you will be responsible for interacting with Mozilla data analysis pipelines as well as the Firefox client and to participate in all levels of an experimentation workflow.
