

Report of Independent Accountants

To the Management of Web.com Group, Inc.

We have examined the accompanying [assertion](#) made by the management of Web.com Group, Inc. ("Web.com" the parent company of "Network Solutions"), titled *Management's Assertion Regarding the Effectiveness of its Controls over the Extended Validation Operation Based on the WebTrust Principles and Criteria for Certification Authorities – Extended Validation SSL v1.6.2* that provides Network Solutions' Extended Validation (EV) Secure Socket Layer (SSL) Certification Authority (CA) services at Herndon, Virginia, United States, and the data centers and back-end office support locations listed in Appendix A, for the Root and Subordinate Keys listed in Appendix B throughout the period April 1, 2018 to March 31, 2019 Web.com has:

- ▶ Disclosed Network Solutions' EV SSL certificate lifecycle management business practices in its [Certificate Practice Statement Version 1.7](#) including its commitment to provide EV SSL certificates in conformity with the CA/Browser Forum Requirements on the Network Solutions website, and provided such services in accordance with its disclosed practices
- ▶ Maintained effective controls to provide reasonable assurance that:
 - The integrity of keys and EV SSL certificates it manages is established and protected throughout their lifecycles; and
 - EV SSL subscriber information is properly authenticated (for the registration activities performed by Network Solutions)

based on the [WebTrust Principles and Criteria for Certification Authorities – Extended Validation SSL v1.6.2](#).

Web.com's management is responsible for its assertion and for specifying the aforementioned Criteria. Our responsibility is to express an opinion on management's assertion based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants (AICPA). Those standards require that we plan and perform the examination to obtain reasonable assurance about whether management's assertion is fairly stated, in all material respects. An examination involves performing procedures to obtain evidence about management's assertion. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of management's assertion, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

The relative effectiveness and significance of specific controls at Network Solutions and their effect on assessments of control risk for subscribers and relying parties are dependent on their interaction with the controls, and other factors present at individual subscriber and relying party locations. We have performed no procedures to evaluate the effectiveness of controls at individual subscriber and relying party locations.

Our examination was not conducted for the purpose of evaluating Network Solutions' cybersecurity risk management program. Accordingly, we do not express an opinion or any other form of assurance on its cybersecurity risk management program.

There are inherent limitations in the effectiveness of any system of internal control, including the possibility of human error and the circumvention of controls. Because of inherent limitations in its internal control, Network Solutions may achieve reasonable, but not absolute assurance that all security events are prevented and, for those controls may provide reasonable, but not absolute assurance that its commitments and system requirements are achieved. Controls may not prevent or detect and correct, error, fraud, unauthorized access to systems and information, or failure to comply with internal and external policies or requirements.

Examples of inherent limitations of internal controls related to security include (a) vulnerabilities in information technology components as a result of design by their manufacturer or developer; (b) breakdown of internal control at a vendor or business partner; and (c) persistent attackers with the resources to use advanced technical means and sophisticated social engineering techniques specifically targeting the entity. Furthermore, the projection of any evaluations of effectiveness to future periods is subject to the risk that controls may become inadequate because of changes in conditions, that the degree of compliance with such controls may deteriorate, or that changes made to the system or controls, or the failure to make needed changes to the system or controls, may alter the validity of such evaluations.

In our opinion, Web.com management's assertion referred to above is fairly stated, in all material respects, based on the aforementioned criteria.

The WebTrust seal of assurance for certification authorities on Network Solutions' Web site constitutes a symbolic representation of the contents of this report and it is not intended, nor should it be construed, to update this report or provide any additional assurance.

This report does not include any representation as to the quality of Network Solutions' CA services beyond those covered by the [WebTrust Principles and Criteria for Certification Authorities – Extended Validation SSL v1.6.2](#) criteria, or the suitability of any of Network Solutions' services for any customer's intended purpose.

June 26, 2019

**Management's Assertion Regarding the Effectiveness of Its Controls
Over the Extended Validation Operation
Based on the WebTrust Principles and Criteria for Certification Authorities –
Extended Validation SSL v1.6.2**

June 26, 2019

We, as the management of Web.com Group, Inc, ("Web.com" the parent company of "Network Solutions") are responsible for operating the Network Solutions' Extended Validation (EV) SSL Certification Authority (CA) services at Herndon, Virginia, United States and the data centers and back-end office support locations listed at Appendix A for the Root CAs and Subordinate CAs listed in Appendix B.

Management of Web.com is responsible for establishing and maintaining effective controls over Network Solutions' CA operations. These controls contain monitoring mechanisms, and actions are taken to correct deficiencies identified.

Controls have inherent limitations, including the possibility of human error and the circumvention or overriding of controls. Accordingly, even effective controls can provide only reasonable assurance with respect to Network Solutions' CA operations. Furthermore, because of changes in conditions, the effectiveness of controls may vary over time.

Management of Web.com has assessed the disclosures of its certificate practices and controls over Network Solutions' EV SSL CA services. Based on that assessment, in providing Network Solutions' EV SSL Certification Authority (CA) services at Herndon, Virginia, United States throughout the period from April 1, 2018 through March 31, 2019, Network Solutions has:

- ▶ Disclosed its EV SSL certificate lifecycle management business practices in its [Certificate Practice Statement \(Version 1.7\)](#) including its commitment to provide EV SSL certificates in conformity with the CA/Browser Forum Requirements on the Network Solution's website, and provided such services in accordance with its disclosed practices
- ▶ Maintained effective controls to provide reasonable assurance that:
 - the integrity of keys and EV SSL certificates it manages was established and protected throughout their lifecycles; and
 - EV SSL subscriber information was properly authenticated (for the registration activities performed by Network Solution

for the Root CA(s) and Subordinate CA(s) in scope for EV SSL Baseline Requirements and Network Security Requirements at Appendix B, based on the [WebTrust Principles and Criteria for Certification Authorities – Extended Validation SSL v1.6.2](#)

Anuj Saxena
Senior Vice President – Software Engineering
Web.com Group, Inc.
